

THE BLAIRMORE ENTERPRISE

VOL. XIV, NO. 30.

BLAIRMORE, ALBERTA, THURSDAY, SEPTEMBER 27, 1923.

\$2.00 YEARLY

Dr. H. M. Tory will continue as president of the University of Alberta. After consideration of the offer recently made him to take the chairmanship of the Canadian Scientific Research Council, he has given an answer to Hon. Perrin Baker, minister of education, to the effect that he will remain.

A rancher named Andrew Mader, who lived near Galloway, B.C., last week, by hanging himself to a beam in a barn.

ST. LUKE'S CHURCH
Service next Sunday morning at 11. Catechism at 10 a.m. Sunday School at 2.30 p.m.

ROBT. DUDLEY PASSES AWAY

After a lingering illness of almost five years' duration, Robert Dudley, one of Fernie's most highly respected citizens, passed away at his home at 10.45 o'clock Thursday morning, at the age of 64 years.

Mr. Dudley, who has resided in Fernie for over twenty years, came west from Pembroke, Ont., to Macleod in 1897, where in company with D. C. Coleman, now vice-president of the C. P. E., he worked as railway agent for this company. The following year he was transferred as agent of the C. P. R. at Kimberley, B.C., and then in 1908 he was sent to Fernie to take

charge of the Coal Creek branch, then operated by the C. P. R. When this line was leased by the Crows' Nest Pass Coal Co. and subsequently operated as their Morrissey, Fernie & Michel Railway, Mr. Dudley remained with the new company as their agent, which position he held continuously until he suffered a stroke in 1919. He never fully recovered from the effects of this illness and for the past five years has been unable to follow his employment.

Mr. Dudley was extremely active in the work of Odd Fellows, having been elected Grand Master for British Columbia for the term of 1914-15. He was also keenly interested in civic affairs.

He is survived by his wife and youngest son, Russell, residing in Fernie; three daughters, Mrs. Smith of Glacier, B.C., Mrs. Taylor, of Nelson, B.C., and Mrs. Tuthill, of Victoria; and three elder sons, Leonard and Garnet, at Vancouver and Edgar at San Francisco, Cal.

The body has been taken to Victoria, B.C., for interment—*Fernie Free Press.*

The provincial government will likely establish another fourteen-foot gage to stop liquor from coming in over the three-thousand-mile boundary east and north. Already, it is said, several quarts of liquor have crossed into Alberta from Saskatchewan and North West Territories.

"PETE" PISTOR VICTIM OF ACCIDENT

An accident at the Blairmore garage building on Saturday afternoon last resulted in the instant death of one of the best known of our Italian-born citizens in the person of Peter Pistor.

"Pete" had been following employment as a carpenter with Contractor Pozzi. While in the act of walking a rafter, he evidently lost his balance and fell headlong to the floor, a distance of about twelve feet. Doctors were on hand in a very few minutes, but owing to a hemorrhage, were unable to save him.

The body was removed to the Ferguson undertaking parlors and prepared for burial, and interment took place on Monday afternoon. The funeral procession was one of the largest ever seen in the district, consisting of about fifty auto vehicles and hundreds of people on foot. An impressive service was held at St. Anne's Catholic church, conducted by Rev. Father McCormick, of Coleman.

"Pete" had been a resident of The Pass for upwards of fourteen years, and was well known and a favorite with all. Since coming here he has also built himself a beautiful home, where the utmost of hospitality reigned.

Mr. Pistor was forty-two years of age and a native of northern Italy, where he is survived by a blind brother and a grandfather, now over five score years. He was a member of the Italian Society and the local lodge of the L. O. O. F. His wife and stepdaughter, Mrs. S. Trono, are left to mourn his loss.

CURFEW LAW WILL BE ENFORCED

But a small amount of business was transacted at Monday night's meeting of the town council. The curfew bell at 9 p.m. will warn children under fourteen that they are to be at home unless in charge of parent or guardian.

Council decided to take immediate steps towards erecting a bridge at the foot of Sixth Avenue and opening a straight channel for the river between the West Canadian spur bridge and Sixth Avenue, to prevent a recurrence of the damage done by the river last spring.

Word from Superintendent Mackintosh, of the C.P.R., in connection with cribbing Lyon Creek, suggested that the matter be allowed to remain for a while till their steam shovel is again in operation at the slide, when the company would be pleased to cooperate with the town in the matter.

All papers are liable to experience typographical errors. One of the city dailies, referring to a train wreck in which a number of hogs were crippled, stated: "About thirty boys were mementos of Curfew By-Law. Council killed or had to be shot."

decided to rigidly enforce the by-law on and after October 1st. The curfew bell at 9 p.m. will warn children under fourteen that they are to be at home unless in charge of parent or guardian.

Council decided to take immediate steps towards erecting a bridge at the foot of Sixth Avenue and opening a straight channel for the river between the West Canadian spur bridge and Sixth Avenue, to prevent a recurrence of the damage done by the river last spring.

Word from Superintendent Mackintosh, of the C.P.R., in connection with cribbing Lyon Creek, suggested that the matter be allowed to remain for a while till their steam shovel is again in operation at the slide, when the company would be pleased to cooperate with the town in the matter.

TRIBUTES OF RESPECT FOR LATE PETER PISTOR

Through the columns of The Enterprise, Mrs. P. Pistor and her daughter, Mrs. S. Trono, desire to thank all kind friends for assistance and expressions of sympathy with them in their sudden bereavement, and the following for beautiful floral tributes: Mr. and Mrs. F. M. Thompson and family, Mr. and Mrs. Pete Ubertino and family, Mr. and Mrs. J. E. Gillis, Mr. and Mrs. E. J. Pozzi and family, Mr. and Mrs. L. H. Putnam, The Trono Family, Mr. Marcial and family, Mrs. E. Eckmiller and James Loto, His Dear Wife, P. S. Kafoury and family, Mr. and Mrs. A. Elliott, and family, Archie McLeod, junior, Mr. Giacometti and family, Mr. and Mrs. W. L. Evans and family, John Shaffer, Mr. and Mrs. F. M. Pinkney and family, Mr. and Mrs. Bert Sander, Blairmore Lodge 68, L.O.O.F., Mr. and Mrs. H. Pinkney, Mr. and Mrs. J. Holloway, Fellow Workmen, Mr. and Mrs. Fabro and family, Mr. and Mrs. J. Angus McDonald and family, Mr. and Mrs. Pavin and family, Mr. and Mrs. Avoledo and family, all of Blairmore; and Mr. James Vincent, of Medicine Hat.

WHOLESALE BUSINESS CHANGING HANDS

The business conducted by Mark Sartoris and known as the Blairmore Wholesale Company, is this week changing hands, the new owners being Messrs. Plunkett & Savage, wholesale grocery and fruit merchants, of Lethbridge. We understand that Mr. Robert Gray, who for a number of years has been drummer in this district for the firm, will be the resident manager. The transfer will likely take place this week end.

DIDN'T HAPPEN AT FRANK

Mrs. Murphy was getting the supper for the children on Saturday night last, when a young woman came to her door.

"I'm a collector for the Drunkards' Home," she said. "Could you help us?"

"Come around tonight, miss, and I'll give you Murphy!"

Looking Forward

The more you think about the future, and about Opportunity and Success, the more enthusiastic you become about being a money saver.

If you have mastered the art of saving, you can forecast with reasonable accuracy how much of a factor you will be in the days of opportunity which are drawing near.

"Double your Savings; IT CAN BE DONE."

WORLD HAPPENINGS BRIEFLY TOLD

Premier Bruce of the Australian Commonwealth, says a British naval base at Singapore is a vital necessity.

The schooner *Review*, which sailed from Halifax in June with a cargo of lumber, has been given up as lost with all hands.

Lord Bickenhead received so many invitations in Canada to deliver addresses that he cancelled his pleasure tour to Hot Springs.

The death is announced of Stephen Dragomiris, former premier of Greece. Mr. Dragomiris was head of the Greek cabinet in 1910.

After an investigation, the British Columbia Game Board expresses the belief that there is a leakage of at least \$60,000 a year in provincial fur royalties.

A large meeting of Kent farmers at Canterbury, England, passed a resolution requesting the government to consider the question of taxing foreign barley with a view to assisting British agriculture.

A Canadian company has been negotiating for the Empire Theatre site in Leicester Square, London, which it is stated, sold for \$270,000 a few years ago, but the purchase has not yet been completed.

Saskatchewan Liquor Commission, in a statement issued Sept. 18, reported the seizure of 67,293 gallons of beer, 978 gallons of hard liquor, and 1,272 gallons of wine since January.

The Ontario Government will pay slightly over \$200,000 succession duties from the estate of the late Sir John Hendrie, former lieutenant-governor and president of the Bank of Hamilton. In addition it cost \$2,023 for law stamps for the will.

The cost of living in England on September 1 was 73 per cent. above the pre-war figure and 2 per cent. higher than on August 1 of this year, according to figures published in the Ministry of Labor Gazette.

Volunteers for Harvest Help

Nearly 160 men standstom for the two normal schools in Calgary volunteered for work in the harvest fields of Alberta, and were granted leave for a month from their studies, for that purpose.

A man's knowledge is not as powerful as a woman's intuition.

MRS. ALBERT BLUNT

KIDNEY TROUBLE!

The Kidneys are the Blood Filters—When They Weaken and Stop—The System Becomes Overloaded With Uric Acid.

"Toronto, Ont.—I can highly recommend Dr. Pierce's (and his wife's) Tablets to all those who suffer in any way with their kidneys. My kidneys were weak and I suffered from a scalding and burning sensation. I was almost down and out—just thanks to Doctor Pierce's (and his wife's) Tablets I do not suffer any more. Those who suffer as I did will find Dr. Pierce's (and his wife's) Tablets just the medicine they need."—Mrs. Albert Blunt, Irvine Place.

Ask your nearest druggist for *Doan's*, or send 10 cents to Doan's, Pierce's Laboratory in Bridgeburg, Ont., for trial package. Write Dr. Pierce, First National Hotel, Buffalo, N. Y., for free medical advice.

Synthetic Insulin

New Discovery Said to Have Been Made by British Chemists

Experiments in England with synthetic insulin for the cure of diabetes are reported as proving successful. This new compound, which was discovered by C. A. Newell, a chemist, is made by blending the chemical constituents of insulin and it is said it can be produced easier and cheaper than the ordinary insulin, discovered by Dr. F. G. Banting of Toronto.

A west end London physician who has successfully treated diabetic patients, declares that the difference between the new compound and the ordinary insulin is very great.

"Insulin," he says, "simply supplies something which helps the sugar in the system to be assimilated and the patient can keep on taking it but the new compound supplies fresh material which positively builds up the cells and nature throws off the diseased cells as soon as there are sufficient new ones to replace them, thus completing the cure."

Home Not Complete Without Nervine

When your stomach is badly upset, when you are belching gas and suffering from flatulence, the quickest relief comes from 20 drops of Nervine. Take it in a little water. Nervine has been used for generations and is a necessity in most homes, because of its ability in preventing many small ills that constantly arise. Sold everywhere in 25 cent bottles.

Canada Leads in Wheat

Canada Provides 40 Per Cent. of World's Wheat Exports

According to the London Morning Post, "The leading feature of the cereal year ending August 31 was undoubtedly the assumption by Canada of primacy among the wheat exporting countries. Canada provided 40 per cent. of the world's wheat exports, compared with 28 by the United States, whereas in the preceding year the proportions were 26 and 24 respectively." The Post goes on to say that Canadian wheat is cheap in ratio to its quality. British buyers have recently preferred Argentine to American wheat, due to America shipping winter wheat instead of spring wheat, which fact speaks for itself.

UNREFRESHING SLEEP

If You Are Tired Out When You Arise in the Morning and This Is the Reason—The woman who is the one who aches all over when she arises in the morning, who feels depressed most of the time, needs the help that Dr. Williams' Pink Pills can give her—most blood and strong nerves.

The number of disorders that are caused by this blood is amazing and most women are careless about the condition of their blood. It quietly the nerves are affected and the patient becomes irritable, worries over trifles, does not sleep as well and it feels and is not refreshed by rest. There may be stomach trouble and headache. This is a condition that calls for Dr. Williams' Pink Pills.

Give Dr. Williams' Pink Pills a fair trial. The first bottle will be noticed by your appetite. You will be hungry by meal time. As the blood becomes clearer, it feeds and soothes the irritated nerves, sleep becomes sounder and more refreshing, your worries become less, your weight lighter. These are some of the things these tonic pills do. Try them for any trouble you have with blood. You can get these pills from any medicine dealer or by mail at 50 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Will Attempt Flight Across North Pole

Amundsen Is Determined to Carry Out Former Plan

Captain Roald D. Amundsen, discoverer of the South Pole and Arctic explorer, and captain Harold G. Hooton, head of the recent expedition to Wrangell Island for the relief of the ill-fated Albatross party, arrived from Nome, Alaska, on the steamer *Victoria*.

Capt. Amundsen confirmed his previous announcement that he would again attempt an airplane flight across the North Pole, starting this time from Spitzbergen. His previous attempt last summer was frustrated when the landing apparatus of his plane was smashed in a test flight at his base at Wainwright, near Point Barrow, Alaska.

Capt. Amundsen said he would return soon to Norway to complete his preparations for next summer's flight.

The explorer said that his ship, the *Maud*, in which he originally planned to drift with the Arctic ice pack past the North Pole, was moving slowly northward with the pack and should complete the drift within three years.

According to the latest available information, the *Maud* should be in about 74 degrees north latitude. Captain Amundsen said, "She is keeping in touch with Spitzbergen by wireless and has plenty of supplies aboard."

Bilious fits and poor color quickly give way to rosy cheeks and buoyant good health. Sold every where in 25c boxes.

Gigantic Economic Lesson

Economic Reactions From War and Other Disasters Effect All Countries

London's market view of the incalculable Japanese disaster is that its economic reactions must be serious and adversely affect practically all countries.

It cannot be so. The world has been learning something along this line from the Great War, and it is still sweating it, that hard school. No further back than the San Francisco earthquake and fire of 1906 the market-places were little disposed to consider the great destruction of property and absolute loss and setback to the human struggle for material well-being. They say in it was a new stimulus to productive effort and quickened employment of labor and growth in prosperity. They noted the great outpour of ready insurance money and forgot that it was all being withdrawn from production elsewhere and otherwise.

We shall not hear much talk of this kind about the great Japanese affliction of dispute of its bearing as a world affliction. The war is beating and beating into the human mind. Either capital or labor or both together cannot be destroyed on a large scale without serious and far-reaching economic injury. It is an absolute loss to the world without any material compensation to any other. It has to be made up fully before the world can start out again from the old vantage point. And all countries in debt from the world war will not have made up the loss until that debt has been liquidated.

When civilized mankind has well learned this lesson it may make up its mind that unavoidable causes of destruction of life and property are still plenty enough on earth without such deliberately created and vastly more destructive causes as war—From the New York World.

It is usually safe to say that when a child is pale, sickly, peevish and restless, the cause is worms. These parasites range the stomach and intestines, causing various disorders of the digestion and preventing the infant from deriving sustenance from food. Miller's Worm Powders, by destroying the worms, correct these faults of the digestion and serve to restore the organs to healthy action.

Thanksgiving, Nov. 12

Thanksgiving Day this year will fall on Monday, November 12. The law provides that Thanksgiving Day will be on the Monday of the week in which Armistice Day falls. Sunday, November 11, being Armistice Day, the following will be Thanksgiving Day, both days being celebrated in one.

Hard and soft corns both yield to Hottelway's Corn Remover, which is entirely safe to use, and certain and satisfactory in its action.

A Fixed Easter

The League of Nations is preparing to reform the calendar and to consider the subject of a fixed Easter. If Easter is to be fixed the probable day will be the second Sunday in April, as proposed in Lord Dunsborough's bill of 1931. All other holidays would be reckoned by reference to Easter.

The largest fair in the world is being exhibited at the Natural History Museum, South Kensington. It is 12 in. in length, exclusive of its powerful limbs.

The only three things entirely empty are a vacuum, Europe's purse, and the house when the wife is away.

Silkworm Spins Colored Silk

By injecting dye into their cocoons, a silkworm which is reported to have caused silkworms to spin colored threads. Not only the ordinary shades, but the tones and hues that are made from combining various tints, are produced by the little workmen receiving treatment by this process. Silk is usually dyed after it has been wound and twisted into floss, but the new method is expected to grow in colors that will not fade.

Wealth in King Tut's Tomb

Discovery is Said to Be Worth a Thousand Million Pounds

The discovery of King Tutankhamen's tomb is worth a thousand million pounds to the Government of Egypt on account of the finds made there, said Rev. S. H. Rhoads, of Halifax, Palestine, in the course of an interview at Ottawa.

Rev. M. Rhoads said that if the Egyptian Government decided to sell he would himself undertake to raise the money to purchase at that price. Rev. Mr. Rhoads, who is a converted Jew, was invited to Canada, some years ago by the Presbyterian Church of Canada to organize and take charge of the Presbyterian missions to the Jews, and for 15 years was in that work.

He built the Christian synagogue in Toronto and also organized the work in Montreal and Winnipeg. For the last four years he has lived in Palestine, laboring under the British Society for the Propagation of the Gospel among the Jews.

Asked as to the much discussed Balfour declaration as to Palestine being made the national home of the Jews, Mr. Rhoads said there was no abatement. He declared the Jews were doing wonderful work in Palestine, even providing free education to Arab children, much to the disgust of the officials, or chiefs, who seem to be in the progress of education the destruction of cheap labor.

Poultry Now Shipped in New Type Cars

Live Birds Arrive at Destination in Fine Condition

As a result of the development of shipments of live poultry by the carload to the east from the prairie provinces, the railways have supplied a new type of car for the purpose. It is stated that 5,000 live fat hens or other birds can be shipped safely in one of these cars, although they are not usually filled to final capacity.

Several cars of live poultry have been shipped from Manitoba and more from the two western provinces. Northern Alberta supplying large quantities of birds for this purpose. In addition a few cars have been shipped to the Pacific coast, and have been received in fine condition. In a car shipped from Edmonton to Vancouver, there was not a single casualty, and the birds arrived in fine condition. There were 3,600 fowls in this special car.

Worms sap the strength and undermine the vitality of children. Strengthen your children by Miller's Worm Extremities to drive out the parasites.

A Model House

The Perfect Dwelling Shown at a Recent Exhibition

At an exposition there was recently exhibited a house fitted with every known electrical appliance. Iceless refrigerators, dishwashing machines, stoves that could be set to start cooking at any time desired and which would automatically shut off the heat and keep the food warm when the meal was done, odorless incinerators in the basement connected with the kitchen by a chute, and vacuum cleaners, all operated at the touch of a button; doing, as if by magic, work that would require hours of back-breaking toil. Walls built on the principle of a vacuum bottle would keep the rooms cool in summer and save heat in winter. Wide expanses of windows abolished the dark corners that are often breeding places for germs. Beautifully tinted walls and floors were made of cement and concrete, so durable that they could be cleaned with a hose.

Mice Carry Asthma

Though bronchial asthma has been attributed to food, weather and emanations from the cat, dog and horse, the first case traced to emanate from mice has been lately reported by Dr. William Soltz, of the Long Island College Hospital. For seven years a married woman of 36 had suffered from the attack, commonly at night and chiefly from December to March, but no explanation appeared until the number of mouse-traps around the place was noticed. The rats and mice infesting the house having been driven out, no asthma has occurred for three years.

Finding Work For Britishers

Making Effort to Place Recent Arrivals From Britain

W. M. Jones, Director of Administration of the Soldier Settlement Board, has been assigned by Hon. James A. Robb, Minister of Immigration, who also has charge of the Soldier Settlement Board, to co-ordinate the efforts of the different agencies engaged in finding work for the thousands of British young men, who came to Canada in August to work in the harvest fields of Western Canada. A large number of them will find themselves without employment once the harvesting is completed, and in the majority of cases they intend to remain in Canada if they can secure employment.

The Department of Immigration and Colonization, the Employment Service of Canada, as also the railway companies, are actively engaged in trying to place these recent British arrivals, who include skilled as well as unskilled workers, and already a number have found permanent jobs.

A number, trained in shipbuilding work, have been engaged by a shipbuilding firm at Collingwood, Ont.

Isostasy a New Force

Was Cause of Earthquake in Japan Says Geologist

A new earth force—Isostasy—caused the Japanese catastrophe, according to Dr. Chester A. Reeds, Acting Director of the Geological Department of the American Museum of Natural History, and one of America's foremost authorities on earthquakes and their causes.

"It is a comparatively recent discovery and one not yet fully understood by geologists," he said.

"When they have completed their examinations of that force" or principle, the term designating it probably will become as familiar to school children as gravity.

"If gravity is truly the greatest of earth forces, Isostasy is its smaller, but tremendously powerful brother. And, as is the way with smaller brothers, Isostasy calls on and receives help from gravity whenever it needs it."

Japan's earthquake troubles have been due to Isostasy. Dr. Reeds declared. At the rate Isostasy is working, that country may not find relief from earthquakes for thousands of years, he believes.

Dead sharks than by water sharks.

GIVE YOUR RED CROSS A BUSHEL OF GRAIN

IN the midst of your plenty this year, do not forget your Red Cross, which needs your membership and needs your subscription. The annual drive for membership and finance starts this week. Your Red Cross stood ready to help you in your need—now it is your turn.

Here is the Plan—Will You Do Your Bit?

YOU will never miss a few bushels of grain; when you haul your next load to the elevator just tell the elevator man that you wish to donate some grain to the RED CROSS. He will give you a cheque immediately for cash value of the number of bushels you wish to give. In addition to this he will add five cents per bushel as the donation of the elevator company to the Red Cross. You endorse the cheque payable to the Red Cross and hand it back to him; he will then send it in to PROVINCIAL RED CROSS HEAD-QUARTERS, and you will receive an acknowledgment in the form of a membership certificate and button direct from us. It is estimated that if each farmer with 1/4 section gives 2 bushels, with 1/2 section gives 5 bushels.

HAT, with the cash donations from towns and cities, the Alberta Division quota of \$55,000 will be reached easily. This plan has the endorsement and recommendation of The Lieutenant-Governor of the Province. The Committee of the Alberta Wheat Pool. The Alberta Elevator Companies.

YOUR RED CROSS calls upon you again in the name of suffering humanity to give from your plenty for the benefit of those less fortunate. 82 per cent of all monies collected will be spent on RED CROSS ACTIVITIES IN THE PROVINCE OF ALBERTA, such as rural hospitals, nursing service, etc. 18 per cent will be Alberta's share for Japanese Disaster Relief.

DO YOUR BIT and DO IT NOW

CANADIAN RED CROSS SOCIETY

Alberta Division.

If you prefer to make your donation in cash, mail your cheque to: The Honorary Secretary Canadian Red Cross Society, Alberta Division, 208 Beveridge Building, Calgary.

APPRECIATES SUPPORT FROM THE BLAIRMORE ENTERPRISE

Calgary, Alberta, Sept. 21, 1922.
Editor Enterprise,
Blairmore, Alberta.

Dear Sir: The Alberta Division in its annual appeal for funds and memberships is this year making a special request to the farmers of the province for donations of grain which will be regarded as equivalent to membership fees. This appeal is receiving the support of the grain companies of the province, and instructions are being issued to elevator men as to the basis upon which donations will be handled. The Wheat Pool Committee, through their secretary, Mr. Jackson, also endorsed the campaign for wheat, and emphasized the fact that although farmers have signed the wheat pool contract, they are still at liberty to make any donation which they may desire to the Red Cross.

I wish to take the opportunity of expressing to you on behalf of the Executive of the Alberta Division our very grateful appreciation of the splendid service which you have given to the Red Cross throughout the year and for the kindly co-operation which we have had from you at all times. We very greatly appreciate the assistance which you gave our membership campaign last year. Our Executive is of the opinion that much of the success of our Red Cross work in the province is due to the generosity and interest shown by the press. We hope that this year we may also count upon your best services, and trust that you may be able, as in the past, to arrange for the insertion of advertising matter at the most reasonable rate which you feel justified in giving to the Society.

Again thanking you for your assistance, I remain,

Yours faithfully,

MARY E. WAAGEN.

First vice-president and Honorary Secretary, Alberta Division.

LABOR MUST HAVE SOMETHING MORE TO SELL

As long as labor bargains only in time and muscle, it will be a poor relation to industry. That progressive employers bear the cost of training programs, efficiency systems, and other devices that help labor produce and gain more, means self-assumed inferiority on the part of labor. When labor sells something more than labor power—when this power comes to mean the best that science, skill, and specialized ability can provide—then, and then only, will labor come to its new estate. Why should the employer alone be the hirer of the engineer, the educator, and the industrial specialist? Labor can equally serve itself with the work of these experts. But, save in a few cases, it doesn't. Industry welcomes everybody who furthers its advance. Labor must make itself the authority on industrial efficiency. Initiative, constructive ideas, new methods of economy and service to consumers—these are the big assets in economic life. Society pays well for them. When labor masters these essentials and makes them part of its merchandise, it will command its own price, nobody will complain, and we shall all be better off together.—Collier's Weekly.

KNIGHTS OF PYTHIAS AND D.O. K.K. MEMBERS, ATTENTION!

The Fall Ceremonial of Omar Kayvan Temple No. 141, will take place in the Castle Hall, Coleman, on Wednesday, October 17th, at 8 p.m. sharp. Keep this date open and be there.

CHANGES IN TRAIN SERVICE

The new fall schedule of the C.P.R. contains some slight changes affecting local trains. Under the new schedule, Train 67 will leave Medicine Hat at 11:15 p.m., leave Lethbridge 4:10 a.m., leave Blairmore 8:20 a.m., arriving at Nelson 8:30 p.m.

Train No. 68 will leave Nelson at 6:30 a.m., arrive at Blairmore at 10:45 a.m., arrive at Medicine Hat at 6:15 a.m., same as at present.

Local No. 535 will leave Macleod instead of Lethbridge on Monday, Wednesdays and Fridays at 12:45 p.m., arriving at Blairmore at 3:15 p.m. instead of 3:20 p.m., as at present. Local No. 536 will leave Blairmore at 10:01 a.m. on Tuesdays, Thursdays and Saturdays, connecting for Calgary at Macleod.

Another change of note is that the Carleton train will now run daily except Sunday from Carleton to Macleod and return, leaving Carleton at 8:10 a.m., arriving at Lethbridge at 11:05 a.m. and Macleod at 12:20. On this return, the train will leave Macleod at 1 p.m. and Lethbridge at 2:25 instead of 2:30 as at present, arriving at Carleton at 5:45 p.m. instead of at 6:30 as at present.

No. 1 and 2, the Imperial—No. 1 westbound will arrive at Medicine Hat at 9:10 p.m. instead of 9:50 p.m., leave at 9:25 p.m. instead of 10:15, arrive at Calgary 4:00 a.m. instead of 4:30 a.m. and leave at 4:30 a.m. daily. No. 2, eastbound, will arrive Calgary 1:05 a.m. and leave at 1:35 a.m. instead of 1:55 a.m. as at present, arrive Medicine Hat at 7:30 a.m. and leave 7:55 a.m. daily instead of 8:15 as at present.

No. 3, Vancouver Express will arrive Medicine Hat 12:00 noon, instead of 12:15 p.m., leave at 12:20 instead of 12:35 p.m., arrive Calgary at 6:50 p.m. instead of 7:30 p.m. daily.

No. 4, Toronto Express, will arrive Calgary as at present, at 2:05 p.m., leave 2:35, arrive Medicine Hat 8:55 p.m. leave at 9:20, daily instead of 9:10 p.m.

No. 526 will leave Edmonton 11:55 p.m. daily, arriving Calgary at 6:45 a.m., as at present.

No. 542 will leave Calgary at 6:35 p.m., arriving Macleod at 10:55 p.m., daily except Sunday, the same as at present.

No. 539 leaves Macleod 6:40 a.m., arriving Calgary 10:55 a.m., daily except Sunday, as at present.

No. 534 will leave Calgary 8:00 a.m. Mondays, Wednesdays and Fridays, arriving Macleod at 12:05 p.m. and Lethbridge at 1:10 p.m. and Crow's Nest at 3:30 p.m. Connections at Macleod both east and west.

No. 533 will leave Lethbridge at 11:20 a.m., Macleod 12:50 p.m. and arrive Calgary 4:40 p.m. Tuesdays, Thursdays and Saturdays.

No. 538 will leave Calgary at 8:25 a.m., arriving Lethbridge at 1:10 p.m. as at present, but daily except Sunday.

No. 544 will leave Calgary daily at 9:15 p.m., arriving Lethbridge 2:00 a.m., as at present, making connection at Lethbridge with No. 68 for point east, and with No. 67 for Cranbrook, Spokane, Nelson, etc.

No. 537 will leave Lethbridge daily except Sunday at 4:20 p.m., arriving Calgary 9:10 p.m.

No. 543 will leave Lethbridge daily at 3:15 a.m., as at present, arriving at Calgary at 7:55 a.m. instead of 8:00 a.m., as at present.

The Trans-Canada Limited, trains 7 and 8 will be withdrawn, the last train eastbound passing Calgary and Medicine Hat on September 30 and last train westbound passing these points October 2.

The above schedule becomes effective on and after September 30th.

MONTANA AND THE GRASSHOPPERS

Montana will adopt Alberta's method of fighting the grasshoppers, if state authorities will agree to furnish the funds, it was decided at a conference held in Great Falls on August 31, at which Alberta officials were present, and explained this province's method of campaign. Those attending from Alberta were Z. McIlmoyle, as-

stant deputy minister of agriculture, E. H. Strickland, professor of entomology at the university, H. L. Seaman, entomologist at the dominion experimental farm, Lethbridge, and W. H. Fairfield, superintendent of that farm. Montana state and federal officials have due recognition to the success which attended the Alberta campaign, and also to the fact that neglect of the situation in Montana had caused much of the infestation in Alberta. Definite steps to fight further appearance of the pest in Montana will be taken as a result of the conference. The object of the visit of the Alberta officials to Montana, was to urge some action, and to bring home the fact that it was from Montana that the bulk of the hoppers had come to Alberta.

TO NEW SUBSCRIBERS—The Blairmore Enterprise from now till December 31st, 1924, for two dollars.

Dr. Olivier returned from Calgary yesterday in a new Hudson Super-Six.

Charles Palmer, of St. Paul, Minn., and a sister are visiting here with their brother, Fred Palmer.

Sergt. Duncan, of the local A.P.P. detachment, was a visitor to Lethbridge the early part of the week.

After going without for just one year, both Cranbrook and Nelson have booked the Chautauque for 1924.

A one-armed man is serving a jail sentence because the other arm was caught in the act of conveying liquor.

The Dominion department of agriculture is operating a semi-commercial fruit dehydrating plant at Penticton, B. C.

George Polletier, member of the Coleman hockey team, was married at Taber last week to Miss Hesketh. They will reside at Coleman.

The city of Nelson B.C., went over nine hundred dollars to celebrate the opening of the new highway, connecting with Spokane.

It's a safe bet that some innocent creature will be the victim of the machine gun race to be operated in connection with enforcing the Liquor Act.

A successful tea and sale of home cooking, etc., was held at the home of Mrs. J. E. Upton on Tuesday evening, proceeds for the Union church building fund.

One prairie paper refers to fifty-three loads to the acre. Gosh all Henlock! One cat sometimes sees that many "loads" staggering over a twenty-five foot lot in The Pass.

The Mountaineer, trains 13 and 14, between Chicago, St. Paul and Vancouver have been withdrawn. Connections now made by Trains 1 and 2 at Moose Jaw from and to Chicago Minneapolis and St. Paul.

Mr. and Mrs. R. J. Crooks, of Frank, have as their guests the former's mother, Mrs. John Crooks, of Vancouver, B.C., and Miss Ena Crooks, sister of the Hohmemon hospital staff of San Francisco.

The Initiatory Degree will be conferred at the regular meeting of Coleman Lodge No. 36, L.O.O.F., on Monday night next. An invitation to all local members has been extended.

A report contained in the Calgary Albertan, states that Mrs. Corse was informed by leading business men, during the course of her meeting at the Union church here, that conditions in Blairmore were not worse than before prohibition. We might state that the business men in question were not in a position to know. Anyone actually knowing conditions could not with a clear conscience declare that present conditions are an improvement on conditions prevailing prior to prohibition.

TO NEW SUBSCRIBERS—The Blairmore Enterprise from now till December 31st, 1924, for two dollars.

Donald Bians received ten thousand German marks for a mere kiss this morning.

One hundred boxes of Creston apples will be exhibited at the London exhibition next year.

A daughter was born to Mr. and Mrs. George Bouthillier on Wednesday, September the 26th.

The Town of Blairmore will establish silent policemen at four or five of the main street intersections.

Rev. Ben Spence, who won such fame in Ontario, is to assist prohibitionists in their campaign in Alberta.

Mr. Harry Burns, manager of McLaren Lumber Co., has returned from the coast, where he had been to recuperate from his recent illness.

The High Cost of Living Commission should investigate the scale of penalties being handed out by J. P.s and magistrates nowadays, particularly those meted out under the Alberta Liquor Act enforcement.

Mr. R. P. Blakie, provincial government architect, of Edmonton, was in town on Tuesday for the purpose of taking over from the contractors the new government buildings and sewage system extension, etc.

Venerable Archdeacon Graham, D. D., of Kootenay, conducted the morning service at St. Luke's church on Sunday last, delivering an able discourse on the subject of "Religion: The Sacrament of the Lord's Supper was administered during the service.

Dr. Scott, who for almost a year has been stationed as medical practitioner at Coleman, has moved to Innisfail. Prior to leaving Coleman, Dr. and Mrs. Scott were guests at a banquet and dance given in the Odd-fellows hall.

When Firpo, the prize fighter, known as "the Wild Bull of the Pampas," appeared at a meeting in New York, a crowd of women tried to kiss him. "There's no accounting for taste," as the old woman said when she kissed the cow, and the New York women may have had this in mind when they tried to kiss the bull.

Henry Walter has returned after spending about a year in Germany. Conditions were not at all such as would induce Henry to end his days there and he preferred to live out the balance of life's span on "Canadian soil." While in Germany, Henry had the distinction of being the only real "millionaire" in German marks in his community and was regarded as the Overlord Mayor.

The statement has been made that no white man has ever seen the body of an elephant that died from natural causes, either in Africa or India, and where they go when they feel the summons is one of the secrets hidden from the most persistent students of natural history. One of the stories on the subject is that there is a secret graveyard in the mountains in the interior of Africa, entrance to which has not been discovered, to which the elephants soberly journey to find their tomb, and varied stories have been told of the millions of value in ivory there if venturesome men could but find the elephant sleeping ground.

Young man, don't swear. There is no occasion for it outside of a printing office, where it is useful when the paper is behind time. It also comes in handy in proof-reading and is "indispensable" when the ink works badly and the press begins to "buck." It is sometimes brought into use when the foreman's mood; and it has been known to entirely remove the tired feeling of the editor when he looks over the paper after it has been printed. Outside the printing office it is a foolish habit.

Canada's Achievements In Industry And Finance Is Subject Of Comment

Canada is much better off, in case of a worst case, than she was last year. Her crops are good. She has imported some 7,000 British harvesters in addition to her own for her nearly 400,000,000 bushels of wheat. Through railroads, steamship companies and various associations she is actively promoting colonization. Close neighbor as she is, and with so large a population of former Americans, probably few of us have realized her remarkable achievements in trade, industry and finance, says the New York Times. The Index, published by the New York Trust Company, reminds us that Canada, with less than 9,000,000 population, is first in the world in proportion of exports per capita of population, and actually fourth in volume of exports.

Her world trade for the year ended June, 1923, was nearly \$1,500,000,000. Our population is more than twelve times hers. Our world trade for the same twelve months amounted to \$7,735,385,000, only about four times hers. The whole volume of trade between the two countries was about \$980,000,000, say an eighth of the value of our whole-world trade. Canada sold us products valued at \$294,000,000, bought of us goods valued at \$585,000,000; and the increase in her exports was larger than that of ours to her. Her import and export trade was so more valuable than all her trade with the British Empire, though that, too, made decided gains.

Canada is already "our second best customer," not much behind Great Britain; and she may easily become our best customer. Both our people and our capital have gone into the Dominion largely. In the years from 1900 to 1922 nearly 1,400,000 Americans crossed the northern border. The Yankee immigrants were more than one-third of the total immigration; at that time, outnumbered the British by more than 30,000. American investments in Canada are estimated at \$2,500,000,000, nearly as much as British investments; and two-thirds of this sum has been invested since 1914. Americans hold \$701,000,000 of Canadian government provincial and municipal bonds; the British hold \$511,000,000. American industrial investments in Canada amount to nearly \$550,000,000, about 23 per cent. of the whole, while British capital in the same enterprises is estimated at \$285,000,000, slightly more than 10 per cent. of the total. Railways, mines, automobile manufactures, meat packing, metals, paint, pulp, paper, and oil refining are the main American investments.

With her immense, thinly populated area, Canada is still chiefly an agricultural country. Her farm property is valued at \$8,500,000,000, her manufactures at about half that sum; but these are moving ahead rapidly. Water power is being developed on a large scale. The sum of \$330,000,000 was spent on building in 1922, an increase of more than \$50,000,000 over 1921. Canada is on the high road to a marvelous development, and by her prosperity the United States will be made more prosperous. Our interests and hers are in many respects inseparably entwined.

His Oxford Drawl

An old clergyman sent his son to Oxford. The boy was not brilliant, and college did not improve him; but he cultivated what he believed was the correct Oxford drawl, and when he came down for the summer vacation his father was eager to hear him preach. The son was prepared to show him how to do it. In the morning, after sundry postpones, he announced his text: "He that hath yab to yab, let him yab." In the afternoon his text was, "Now, Bawababab was a wobbab." At night the old man came on and took his text: "Lord have mercy on my son, for he is a lunatic and cork tormented."

Cause and Effect

The farmer cannot sell his wheat at a profit because his export trade has been largely destroyed. His export trade has been largely destroyed because hungry Europe is too poor to buy his wheat. Hungry Europe is too poor to buy his wheat because Europe is in a state of social, economic and political chaos and Europe is in that state because the American Allies helped in the winning of the war. America afterwards refused to help the grave problems of restoring peace. —The Living Church.

It is better to have loved and lost than to be the victim of a breach of promise suit.

"The Matterhorn, one of the most difficult climbs in the world, has an average incline of only 30 degrees."

W. N. U. 1930

Rising From Ruin

Japanese Have Unlimited Faith In Their Own Nation

Among the spectacular incidents of the Japanese calamity there will remain the historical record of the organization and first meeting of the new Yamaguchi cabinet on a lawn in the midst of burning buildings, with the victims of earthquakes and fire lying about. In that place the ministers took their first measures as a cabinet for the mitigation of suffering the restoration of the capital and of the nation. It is a task for heroes. Happily the Japanese are not a people easily thrown into a panic. Whatever may be their individual faith in other directions they have unlimited faith in their own nation and its destiny. Collectively they are the most optimistic of all peoples.

With one hundred square miles of thickly populated territory laid waste, with the capital desolate, the chief seaport utterly destroyed, the Japanese are already cherishing the idea of a new capital and a new national port, far more substantial than the old. Modern cities are to take the place of those in which contrasts of new and old were a picturesque feature. Much that is lost can never be restored, and there is much that the maker of modern Japan will not wish to reproduce. —The Vancouver Province.

Shoes With High Heels

Warning From British Scientist That Women Will Soon Have Less Than Two Toes

A London biologist predicts that, if women keep on wearing high heels, they will find themselves eventually with only one toe. "Horses originally had five toes, but now they have only one," warns the scientist, who adds, "This change probably was brought about by the efforts of horses in the wild state to raise themselves a little higher, to get at the twigs and leaves of trees. The five toes of the deer have been reduced to two, and those of many birds to three."

"Women with very high heels have a gait approaching that of birds. I do not suggest it is not an elegant gait, but it is certainly not at all like that of the domestic fowl. It means that with the high heel now worn, three toes are sufficient for progress; and, as nature always gets rid of superfluous organs, it seems likely that in the course of time women's toes will be reduced to three, and perhaps later to two, or even one."

But the biologist's warning may not be needed for smart women here are now emulating their American sisters and favoring shoes with heels only about an inch in height.

Not Dropping Claim

Stated That Britain Has Not Relinquished Claim to Wrangel Island

Referring to a statement published in Canadian newspapers to the effect that the British Foreign Office informed the Russian Foreign Office that it had never questioned Russian sovereignty in Wrangel Island, the London correspondent of the Manchester Guardian says he understands that the statement that the Foreign Office has renounced the British claim to the island is unfounded.

The Guardian's correspondent adds: "I am told there has been no change in the attitude of the Foreign Office or in the British claim to Wrangel Island."

Canadian Capital In Russia

Sir Donald Mann Thinks Well of Soviet Country

Canadian capital is as safe in Russia as in Canada, Sir Donald Mann, Canadian railway builder, said on his return to Toronto from a 2,500 mile trip through Soviet Russia.

"I believe the Russian Government will live up to any contracts they make."

"What I was impressed by most," Sir Donald said, "was the earnestness of the people. Men in government positions often work all night. Everyone is working at top speed to get the country back on its feet."

In the Nick of Time

Dr. Deo—So the operation on old Richman was in the nick of time?

Dr. Deo—Yes, in another hour he would have recovered without it. —Chicago Journal.

A museum of voices is being conducted in Berlin, wherein all the languages known will be kept on record.

Few men have the ability to combine business with pleasure.

First Icelandic Settlers

Large Number Located in Manitoba in Summer of 1923

The first Icelandic settlers arrived in Canada in the summer of 1873. The marking of this fiftieth anniversary is a matter of particular interest to the people of Manitoba where they located most largely. The Icelanders have been among the most desirable people to come to Manitoba (says the Winnipeg Free Press). They were not merely suited to the climate, but they had the natural qualities to make successful settlers, and the desire to become thorough Canadians and enter into the full citizenship of the country. An industrious and thrifty people they have also shown a high appreciation of the value of education. Coming in to the towns and cities they have won their full share of honors in business and the professions.

There never was a time when Canada was so much in need of settlers of the Icelandic type. And their success is a standing proof of the opportunities which this country offers to people of the right class and character.

Saved Settlers From Starvation

Monument to Memory of Birds Erected in Utah

In Salt Lake City, Utah, is one of the two monuments in the world—the other is in Italy—erected to the memory of birds. This monument commemorates the fact that about the year 1850 the original settlers in Utah were saved from starvation by sea gulls.

A year after their arrival the white settlers were alarmed to observe that their crops were being devoured by myriads of crickets and grasshoppers, which overran the country until it was as if it had been scorched by fire. Prayer was resorted to, and one day, as if in answer to their appeals, there appeared a great flock of sea gulls, which proceeded to devour the pests, and it was not until the "enemy" had been completely annihilated that the gulls took to their wings and disappeared.

The monument commemorating the event was unveiled in 1913.

Saved

De Riche—My son, when I was your age I carried mortar for a gang of bricklayers.

Son—I'm proud of you father. If it hadn't been for your pluck and hard work I might have had to do something like that myself.

Much yellow silk is now raised in Japan.

The Destroyed Japanese Cities

Tokio, Yokohama and Nagoya Were All Flourishing Centres

Tokio, the capital of Japan and situated at the head of the landlocked Bay of Tokyo, had a population of 2,000,000 in 1906, when the last census was taken. Its suburbs add greatly to the total, although the principal railroad centre of the empire, Tokyo, is not an important manufacturing centre. It has a water system, electric and gas lighting, good macadamized roads, public libraries, public works, transportation, education and sanitation being carried on according to the methods of civilized cities all over the world. The imperial university has six faculties and over 3,000 students. The city has suffered several times before from severe earthquakes.

Yokohama, the chief seaport and treaty port of the empire, is on the Bay of Tokyo, about 17 miles south-west of Tokyo, of which it is the port. It had a population of about 600,000. It is a city of marked contrast, the foreign quarters and business district being well built, while the native section is poor. There were many handsome business structures in the city.

Nagoya is the chief city of Owari Province, Hondo, and has a population of approximately 600,000. It is the fifth of the chief cities of Japan. Nagoya is well known as one of the great seats of the pottery trade, to which the manufacture of porcelain is rapidly being added. It lies at the head of the shallow Iseanai Bay, about 30 miles from the Port of Yokohama, with which it communicates by rail and light-draught steamers. Nagoya is a great centre of export for all of the surrounding district. Cotton mills have been established there and an extensive embroidery business is carried on. It is further distinguished as the birthplace of cloisonne enamelling in Japan.

Alberta Butcher

Alberta's butcher stands third among the provinces of the Dominion in respect both of quality and quantity, according to a Federal report just issued, which states that the 1922 province was 15,417,000 pounds, valued at \$5,126,844.

Frequently

"I'm sorry to hear of your husband's death. Did he leave you much?"

"Nearly every night." —London Daily Mail.

The tagus or ivory tree grows profusely in South America.

Predicts Huge Gains In Population Of West In The Next Few Years

Imports of Some Plants Prohibited

New Regulations of the Department of Agriculture Come Into Effect

The new regulations of the Department of Agriculture under the Destructive Insect and Pest Act, requiring the inspection of all imported nursery stock, went into effect on the last of September. Importers of nursery stock, which includes all plants for ornamental purposes or propagation, such as trees, shrubs, vines, bulbs, perennials, etc., except seeds, will be required in future to secure a permit before shipments are brought into Canada.

Imports must be inspected before leaving the country of origin and a certificate of inspection must accompany the invoice. Imports from other countries than the United States can enter Canada only through St. John, N.B., Montreal, Niagara Falls or Vancouver. At these points shipments will be re-inspected or large shipments may be allowed to proceed to destination for inspection. The import of certain plants, the official announcement adds, has been prohibited on account of insect pests or plant diseases.

Supplies For Japan

Red Cross Sending Large Consignment Of Essential Goods

Supplies are being rushed to Japan by the Canadian Government for relief of the thousands of victims of the recent earthquakes, fires and floods in Tokyo and Yokohama. Large quantities of foodstuffs have been purchased by the Department of Trade and Commerce, a considerable part of which is canned milk. Lumber and other materials are also being sent. The Canadian Red Cross Society is arranging to send large consignments of essential goods at the earliest possible moment. Throughout Canada the people are organizing to help Japan in its time of serious need.

Will Exhibit Okanagan Apples

Six hundred boxes of the Okanagan's best apples will be exhibited in England next year at the Empire Exhibition. Frank Dehart, fruit expert of Kelowna, has been commissioned by the Dominion Government to get to other British Columbia's contribution to Canada's display of fruit.

"While they realize that the Dominion, as a result of the financial assistance, will, to the extent of its power, endeavor to develop its own manufacturing industries, and in many cases compete with the goods of the Mother Country, they take the broad view that by so doing these Dominions will increase their international prosperity, and thus provide a wider market within the Empire for the goods of the Mother Country."

The railways of this country were brought into existence to perform the task of turning the vast waste spaces into populated areas. When these are filled," concluded Mr. Robb, "with intelligent people using traffic, it will be time to apply to the railways some of the tests that reasonably apply to other business from the outset. The western country is only now coming into its own, and it is my prediction that in a few years many hundreds of thousands of settlers will be added to its population. It is also our intention to direct attention to the maritime provinces, which offer singular opportunities to the people of the British Isles."

Walk and Be Healthy

People Do Not Take Enough Exercise Says Physician

A prominent consulting physician of national reputation commenting upon the increasing large number of men and women who are afflicted with nervous disorders of various kinds, states emphatically that this growing evil is largely the result of lack of proper exercise. He states that if people would walk at least two miles a day regularly they would never know what insomnia or high blood pressure means. He claims that overfeeding and under exercise are two greatest enemies of health and happiness. He says that cars, taxis and automobiles are the bane of modern urban life and unless this temptation to ride is overcome or properly regulated, the next generation will be flabby and anemic. There is not the least doubt that the use of good leather means increased efficiency both physical and mental. "Walk and Be Healthy" is a slogan well worth keeping before the present generation. A mile a day will keep the doctor away.

Offer B.C. Lumber

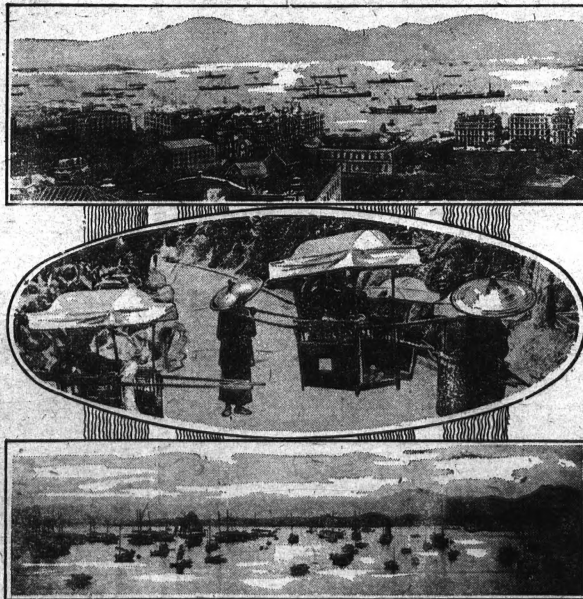

Hon. T. D. Pattullo's offer of a cargo of British Columbia lumber on behalf of the province in co-operation with lumber manufacturers to aid the Japanese in recovering from the effects of their cataclysm, has been transmitted to the Imperial Japanese Government at Tokio.

Fast Train

Passenger—Conductor, is this a fast train?
Conductor—Yes, sir, one of the fastest on the line.
Passenger—Let me out so I can see what it is fastened to.

More people have been taken in by land sharks than by sea.

NO LIKE-E DEVIL PIDGIN

(1) From the road to the Peak. (2) Chairs and coolies at the entrance to the public garden. (3) The Harbor of Hong Kong near Tsim Sha Tsui at dusk.

One of the most fascinating panoramas which a visitor to Hong Kong can see is that of the road there to the Peak at Hong Kong. At every bend of the road there is so much to feast your eyes upon and so many attractions from flower, plant, tree, hill, crag, dale, mountain and sea as you journey forward that you will have suddenly "dropped upon" the Public Gardens, which are more than half-way. The coolies are on your path on either side. The Gardens are charming.

which you have probably never seen before. With a mental note to return to the Gardens at the first opportunity you leave and continue your way. Take a chair into town, a Chinese sedan, one of those waiting outside the gates. It may mean to you to "snag" your way, the "foolish man" trains his camera upon them. Proceeding, the chair-bearers will set you down at the arch-entrance to the Gardens as taboo to them. Please to glance at the picture. The chair-bearers have tipped their hats forward so as to hide their anti-dilemma dials from the "evil-eye" when the "foolish man" trains his camera upon them.

They will have none of it. Anything in which the arch-entrance is concerned is taboo to them. Please to glance at the picture. The chair-bearers have tipped their hats forward so as to hide their anti-dilemma dials from the "evil-eye" when the "foolish man" trains his camera upon them.

BELLEVUE HORTICULTURAL SOCIETY EXHIBITION: PRIZE LIST FOR 1923

Following is a complete list of prize awards in connection with the 1923 exhibition of the Bellevue and District Horticultural and Industrial Society:

Best Garden Display of Vegetables, area 40 square feet, two entries—First prize, silver cup, donated by Mr. A. Bell, won by A. Hallworth, second prize J. Allsopp.

Best Collection of Vegetables, two entries—First prize, \$10.00, donated by Mr. Cole, won by A. Goodwin, second prize to J. Allsopp.

Round White Potatoes, 12 entries—First, second and third prizes to E. Cole.

Round Colored Potatoes, seven entries—First prize only to George Coupland.

Kidney White Potatoes, 13 entries—First, second and third prizes to E. Cole.

Kidney Colored Potatoes, seven entries—First prize to S. Rowe, second to George Coupland.

Best Collection of Potatoes, two entries—First prize, \$5.00, donated by Mr. Cole, awarded to S. Rowe.

Cauliflower, ten entries—First prize of \$5.00, donated by Johnson & Cousins, won by S. Rowe, second A. Goodwin, third J. Radford.

Conical Cabbage, ten entries—First prize J. Cousins, second H. Robinson, third G. Christie.

Flat Cabbage, three entries—First prize Steve Rossia, second G. Christie, third W. H. Chappell.

Round Cabbage, eight entries—First prize and special T. Talbot, second T. Talbot.

Red Cabbage, three entries—First and second prizes to Gilbert Cousins, third to G. W. Goodwin.

Curly Kale, three entries—First to C. Richards, second J. Allsopp, third J. Radford.

Kohl Rabi, eight entries—First to C. Richards, second and third to J. Radford.

Swede Turnip, eleven entries—First to J. Curry, second G. W. Goodwin, third Andrew Goodwin.

White Turnip, four entries—First to J. Curry, second G. Coupland, third C. Richards.

Yellow Turnip, four entries—First to C. Richards, second and third to James Redfern.

Long Carrots, twelve entries—First to A. Hallworth, second C. Richards, third J. Curry.

Other Varieties Carrots, 21 entries—First and second to Fred Padgett, third to J. Cousins and A. Goodwin.

Leeks, eight entries—First to C. Richards, second J. Allsopp, third C. Richards.

Onions, from sets, fifteen entries—First to G. W. Goodwin, second A. Goodwin, third E. Blas.

White Onions from seeds, five entries—First to J. Curry, second E. W. Christie, third Fred Henson.

Yellow Onions from seeds, six entries—First and second to J. Curry, third E. W. Christie.

Red Onions from seeds—First prize to A. Goodwin.

Onions of preceding year—First to James Redfern.

Cluster of Shallots, three entries—First to A. Hallworth, second E. Blas, third Fred Henson.

Cluster of Multipliers, 3 entries—First to G. Christie, second A. Hallworth.

Pickling Onions, four entries—First to S. Rossia, second and third F. Henson.

Long Beets, ten entries—First to G. Christie, second F. Padgett, third A. Hallworth.

Beets, Other Varieties, 24 entries—First and second to J. Radford, third T. Gordon and A. Goodwin.

Paranips, ten entries—First to S. Thomas, second F. Henson, third G. W. Goodwin.

Salafy, seven entries—First, second and third to A. Goodwin.

Round Radish, three entries—First to S. Rowe, second C. V. Asselstine, third Long Radish, first prize to J. Curry.

White Celery, nine entries—First to G. W. Goodwin, second A. Goodwin, first prize of \$5.00, donated by H. Peters.

Red Celery, four entries—First and second to W. H. Chappell, third J. Allsopp.

Curled Lettuce, three entries—First to S. Rossia, second E. Blas, third J. Radford.

Cabbage Lettuce, six entries—First and second prizes to F. Padgett.

Collection of Peas, seven entries—First to H. Robinson, second J. Radford, third A. Goodwin.

Long Pods Broad Beans, seven entries—First prize of \$5.00, donated by Kerr Bros, won by David Morris, second D. Morris, third J. Allsopp.

Pods Wax Beans, nine entries—First and second to J. Curry, third S. Rowe.

Pods Dwarf Green Beans, nine entries—First to J. Curry, second C. Richards, third D. Morris.

Pods Runner Beans, nine entries—First S. Thomas, second J. Curry, third W. H. Chappell.

Broad Windsor Beans, ten entries—First to G. Christie, second A. Goodwin, third F. Henson.

Frame Cucumbers, six entries—First, second and third to J. Allsopp.

Ridge Cucumbers—First to A. Goodwin.

Rhubarb, twelve entries—First to A. Goodwin, second G. W. Goodwin, third A. Goodwin.

Swiss Chard, seven entries—First and second to A. Goodwin.

Red Tomatoes, nine entries—First to D. Morris, second J. Allsopp, third E. Cole.

Green Tomatoes, thirteen entries—First F. Henson, second G. Christie, third F. Padgett.

Tomatoes of Other Varieties, three entries—First to S. Humble.

Vegetable Marrow, white—First to T. Talbot.

Vegetable Marrow, green, six entries—First to J. Redfern, second S. Thomas, second to J. Redfern and C. Richards, third G. Christie.

Pumpkin—Second to E. Cole.

Sweet Corn, eight entries—First to T. Talbot, second J. Curry, third J. Redfern.

Hubbard Squash—First and second to J. Redfern.

Citron—First, second and third to J. Redfern.

Parley Roots, eight entries—First to C. Richards, second E. Blas, third A. Hallworth.

Shelled Peas, eleven entries—First prize donated by Smith Market Co., \$5.00, won by A. Goodwin, second J. Redfern, third S. Rowe.

Collection of Herbs, five entries—First, second and third J. Redfern.

Other Varieties Vegetable—First to C. V. Asselstine.

Other Variety Vegetable Fruit, five entries—First to S. Humble, second and third J. Radford.

Any Variety of Fruit, six entries—First to E. T. Johnson, second S. Humble and J. Redfern, third J. Redfern.

Heads of Wheat, Barley, Oats and Grasses—First prizes to H. Robinson.

Roots of Alfalfa, three entries—First to J. Redfern.

Best Display of Garden Flowers, area 40 square feet, four entries—First prize silver cup donated by Mr. A. Bell, won by Miss Hallworth, second A. Goodwin, third E. Cole.

Best Assorted Bouquet Garden Flowers, nine entries—First and second S. Humble, third A. Goodwin.

Best Arranged Bouquet Garden Flowers, five entries—First and second S. Humble, third D. Morris.

Asters, distinct colors, eight entries—First prize of \$7.50 donated by Mr. C. Emmerson, won by C. Richards, second E. Cole, third A. Goodwin.

Asters, any color, eight entries—First to C. Richards, second W. H. Chappell, third D. Morris.

Best Collection of Pansies, fourteen entries—First and second to A. Goodwin, third E. Cole.

Pansies, any color, 19 entries—First prize of \$3.00, donated by J. H. Robertson, won by A. Goodwin, second and third J. Radford.

Marigolds—First to G. W. Goodwin.

French Marigolds, six entries—First to W. Blinston, second A. Goodwin, third G. W. Goodwin.

African Marigolds, four entries—First to F. Padgett, second A. Goodwin, third G. W. Goodwin.

Dahlias, distinct varieties—First S. Humble.

Show Dahlias—First to S. Humble, second G. Christie.

Cactus Dahlias—First and second to S. Humble, third G. Christie.

Decorative Dahlias—First to G. Richards, second G. Christie.

Stocks, five entries—First to G. Richards, second D. Morris, third W. Blinston.

Slit Bunches Sweet Peas, seven entries—First to C. Richards, second F. Padgett, third J. Curry.

Assorted Bouquet Sweet Peas, ten entries—First to C. Richards, second and third J. Curry.

Best Arranged Bouquet Sweet Peas seven entries—First to A. Hallworth, second J. Curry, third G. Christie.

Zinnias, three entries—First to C. Richards, second A. Goodwin, third E. Cole.

Petunias, double—First prize of \$5.00, donated by J. H. Green, won by J. Curry, second F. Padgett.

Petunias, single, seven entries—First and second to C. Richards, third J. Curry.

Snapdragon, nine entries—First to C. Richards, second D. Morris, third A. Goodwin.

Nasturtiums, eleven entries—First to J. Curry, second C. V. Asselstine, third W. H. Chappell.

Gladiolas, four entries—First and second to C. Richards, third S. Humble.

Balsam—First and second to W. Blinston.

Agnails—Third prize only to D. Morris.

House Plants, any one variety, four

entries—First to F. Padgett, second C. V. Asselstine, third F. Padgett.

House Plants, assorted collection, three entries—First to S. J. Lamey, second F. Padgett, third E. T. Johnson.

Bouquet Wild Flowers, eleven entries—First to Miss Goodwin, second Miss Morris, third A. Christie.

Insect Collection—Special prize awarded by C. V. Asselstine, won by Mary Serra, first and third.

Plain Hand-Sewing—Second prize to Mrs. J. Kerr.

Hand-Made Rug—Third prize to Mrs. J. Radford.

Men's Hand-Knit Socks—First to Mrs. Fred Henson, second Mrs. E. Christie.

White Embroidery Work—First to Mrs. C. H. Pos, Blainmore; second Mrs. C. V. Asselstine, third Mrs. C. H. Pos.

Collection of Fancy Work—First to Mrs. F. Henson, second Mrs. J. Fourneau, third Mrs. S. Rowe.

Colored Embroidery Work on Linen, five entries—First to Mrs. F. Henson and Mrs. Humble, second Mrs. H. A. McDonald, third Miss Florrie Hallworth. Special first to Mrs. Humble.

Pair of Towels—First to Mrs. Henson, second Mrs. S. Rowe.

Crocheted Yoke, seven entries—First to Mrs. F. Henson, second Mrs. J. Fourneau, third Mrs. J. Kerr.

Any Piece Crocheted Work, twelve entries—First to Mrs. J. Fourneau, second Mrs. Fourneau and Mrs. J. Kerr, third Mrs. Henson. First prize donated by S. J. Lamey, value \$5.00.

Cushion, five entries—First to Mrs. H. C. McDonald, second Mrs. Henson, third Mrs. Humble.

Pair Pillow Cases, nine entries—First to Miss F. Hallworth, second Mrs. Henson, third Mrs. Rowe.

Fancy Knitting, vest, shawl or sweater, five entries—First to Mrs. J. Kerr, second Mrs. F. Henson, third Miss Blinston.

Dosen White Eggs—First to Mrs. J. Redfern, second Mrs. H. Robinson.

Dosen Brown Eggs, five entries—First Mrs. Redfern, second Mrs. Goodwin, third Mrs. G. Christie.

Best Dressed Fowl, five entries—First and second to Mrs. A. Goodwin, third Mrs. J. Redfern.

Best Loaf Home-Made Bread, 15 entries—First prize, sack of 98 lb flour donated by Robin Hood Milling Co., won by Mrs. J. Gordon; second prize of 48 lbs sack of flour won by Mrs. Fred Gilroy, third Mrs. Henson.

Best Apple Pie, eight entries—First prize donated by Bellevue Bakery, awarded to Mrs. Gilroy; second to Mrs. Watson, third Mrs. J. Kerr.

Scotch Scones, four entries—First to Mrs. J. Kerr, second Mrs. Gordon.

Undecorated Dark Pound Cake, 5 entries—First prize donated by Johnson & Cousins, awarded to Mrs. S. Humble, second Mrs. Gilroy, third Mrs. J. Kerr.

Collection of Cookies or Fancy Cakes, four entries—First to Mrs. Gilroy, second Mrs. Gilroy, third Mrs. Humble. First special awarded to Mrs. J. Kerr.

Three Quart Jars Jam, asso six entries—First prize donated by Johnson & Cousins, awarded to Mrs. G. Christie, second Mrs. J. Kerr, third Mrs. E. Christie.

Three Quart Jars Fruit, nine entries—First and second to Mrs. S. Humble, third Mrs. J. Kerr.

Three Quart Jars Pickles, six entries—First to Mrs. Humble, second Mrs. Humble, third Mrs. Talbot.

Pound of Butter—First to Mrs. H. Robinson.

Layer Cake, five entries—First to Mrs. J. Kerr, second and third Mrs. Humble.

For Girls Under Sixteen Years Best Piece Colored Embroidery Work, seven entries—First, second and third to Miss D. Radford.

In Class 145-A, Miss Charlesworth won first and second, the third prize being divided between Miss Charlesworth and Miss L. DeJardine.

Prizes to School Children

Art Primary—Neyna Glodet, Agnes Sharp, Katy Perovak.

Grade I, senior—Pauline Urbach, Annie Brown, Elsie Borovoc.

House Plants, any one variety, four

TO NEW SUBSCRIBERS—The Blainmore Enterprise from Nov. 1st to December 31st, 1924, for two dollars.

Grade II—Adella Ventrasco, Martha Dudge, Dania Foud.

Grade III, No. 1—Stanley Whalerski, Mary Hunk, Norman Condon.

Grade III, No. 2—Katy Urbach, Erna Leskook, Vera Scodelaro.

Grade IV—Eda Serra, Ella Padgett, Joe Basso.

Grade V—Jim Hong, Doris Radford, Eugene Excoffin.

Grade VI—Margaret Eccleston, Matt Haimila, Mary Kerr.

Grade VII—Marjorie Groat, Pauline Leskook, Olie Haimila.

Grade VIII—Emilia Blas, Erna McDonald, Clara Charlesworth.

Grade IX—Florence May, May Serra, Lena Raskevich.

Writing Primary—Put Dawn, George Beale, Agnes Sharp.

Grade I, senior—Annie Brown, Annie Koran, Pauline Urbach.

Grade II—Ettore Pagnucco, Eddie Sharp, Ralph Harvey.

Grade III—Eda Marcolin, Mary Hunk, Mary Kosar.

Grade IV—Elsie Willingshofer, Frank Urbach, Mildred Howe.

Grade V—Jim Hong, Irene Charlesworth, John Nicklforick.

Grade VI—Jean Patterson, Sarah Morrison, Margaret Eccleston.

Grades VII and VIII—Marjorie Groat, Josephine Morabito, Monica Chiao.

Mass Grade V—Muriel Goodwin, Ernest Costes, Charlie Danforth.

Grade VI—Irene Knowles, May Harvey, Carrie Hlasney.

Grade VII—Josephine Morabito, Emilie Blas, Willie Marcolin.

Grade VIII—Erna McDonald, Clara Charlesworth, Georgina Chiao.

Literature Scrap Book Mary Serra (special), Lena Raskevich, Florence May.

Insect Collections Mary Serra (special), Orates Serra (special), Mary Serra.

Special in Drawing R. E. Davies.

Summary of Specials Albert Hallworth was successful winner of the Bell Cup in Class I.

Miss Flora Hallworth won the Bell Cup in Class 76.

S. Humble and J. Allsopp met for prizes in the Union Bank Cup competition, and were awarded gold medals by the Club.

Mr. A. Goodwin won the Club's cup for gaining most points in outside-grown produce. C. Richards secured second place. Mr. Goodwin was awarded the gold medal.

Mr. G. Christie won the amateur prize for outside-grown produce—\$6.00. Mr. G. W. Goodwin was awarded the second special prize of four dollars.

Mrs. Fred Henson was awarded the Ladies' Pendant for gaining the most points in the Ladies Section, and Mr. Henson was awarded the Birks' bronze vase.

Mr. C. Emmerson's special prize of \$7.50 went to Mr. Hallworth.

The Eaton special prize went to Mrs. J. Fourneau.

A. May's special prize for cabbage was awarded to Mr. T. Talbot.

Special prize donated by Mr. J. D. McDonald was won by Mr. A. Hallworth in Class 94.

Mrs. S. Humble was winner of the special prize for bouquet of garden flowers.

Mr. Graham, of Coaldale, favored the fair with a special exhibition of bees.

The exhibition in every respect surpassed all former occasions. There were approximately 850 entries, making judging a very difficult task.

The thanks of the Bellevue and District Horticultural and Industrial Society are due all who assisted, especially the many friends who contributed towards the prize funds.

The
Ford Motor Company
OF CANADA, Limited
has authorized a
Weekly Purchase Plan
by which

\$5 is all you need to pay
down for a
Ford

Car, Truck or Tractor
When the weekly payments, together
with interest, equals one-third the
price of the model you desire we make
delivery. The balance can be paid in
forty-eight weekly or twelve monthly
equal instalments.

Ask us about the Ford Weekly
Purchase Plan.

Use Of Gas In Future Wars

Whole Armies May Be Put Out of Commission by Chemicals

Who in which whole armies are put to sleep by gas and captured was pictured as not at all impossible by Colonel F. Bacon, chief of the Technical Division of the United States Chemical Warfare Service, in a statement made public by the New York Chemical Society. He said that gas offers the possibility of ideal war.

"I can easily imagine," says Colonel Bacon, "the official communique of the battle of Patagonia twenty-five years from now, which would read as follows:

"Last night at 10 o'clock our airplanes sprayed on the enemy's position a new gas, aspartite, which has the effect of putting a man to sleep for six hours. At 1 a.m. our troops advanced into the sections held by the enemy, disarmed the sleeping enemy, and the whole army facing this sector is now being sent to the rear as prisoners."

"I realize that this sounds like a fairy tale rather than a statement made with a serious purpose, but it is not beyond possibility. In fact, it is in line with the trend of research in this field.

If the Government would efficiently spend a few millions of dollars a year on research, methods would surely be devised which would make us absolutely safe from an attack without the necessity of maintaining such extensive army and naval organizations as at present.

"To say the use of gas in warfare must be abolished is almost the same as saying that no progress must be made in the art of warfare toward making it more efficient or more humane. If one reads of the great battles of history one will find that the victorious general conquered his enemy because of the fact that he took his position as to have his flank protected by river, mountain range or some naturally strong barrier.

"Much of the strategy of these battles consisted in maneuvering so as to obtain the advantage of position. With the use of gas it is possible to transport a piece of ground so that no troops can cross it, and thus make an artificial barrier for the flank or protect the lines of communication. Moreover, these artificial barriers can be kept barriers for just as short time as the strategy of the particular battle demands. These are but hints, but show the tremendous unexploited possibilities of gas in warfare.

"Like everyone else who is on the other side, I hate war and would ardently support every possible means which would tend towards its abolition. But if we must have war, let us be prepared to wage it in the most efficient and at the same time in the most humane way."

A Stone-Eating Shell Fish

Doing Extensive Damage to Concrete Piers in California

A concrete-eating mollusk has been doing extensive damage to the piers of San Pedro, California. His name is Philod, and he is a bivalve, as are oysters and clams. When fully grown he is about three inches or less by one and a quarter. Just how the mollusk works is unknown. The forward, rounded portion of the shell has a surface resembling a rasp or file. Whether the cutting of the concrete or rock is due wholly to attrition with the rough shell, or whether it is aided by some secretion which softens the material, has not been surely determined.

Germans and Potatoes

Tubers of More Importance in Germany Than in Ireland

"Yes, we have no potatoes today," is the universal complaint in Germany, which played a large part in the downfall of the Cuno Government. The lack of grain has forced Germany to forego large quantities of the bread which plays so great a part in the diet of the French and other continental wheat growing neighbors, with the result that the potato is of more importance in Germany than it is in Ireland. Frederick the Great fought a food war which was called the "potato war" in 1779-78 against the Austrians.

McTavish—"How is your husband tonight, Mrs. McIntosh?"

Mrs. McIntosh—"Oh, he is about well again, thank 'ee, Mr. McTavish."

McTavish—"What? Well again after me walking five miles to enquire?"

Fifty Fifty

Lady—"It's the first time I've ever ridden in one of these taxis."

Driver—"And it's the first time I've ever driven one."

New York newspapers use annually as much paper as could be taken from 42,000 acres of solid timber.

Record Crop For Canada

Preliminary Estimate Places Wheat Yield at Over 470,000,000 Bushels. The Dominion Bureau of Statistics has issued its preliminary estimate of the yields of the principal grain crops, based upon reports of average yields per acre as estimated by crop correspondents at the end of August.

Outstanding features of the present report are the yields of wheat, 470,323,000 bushels; oats, 538,124,000 bushels; and barley, 80,048,000 bushels, all these being the largest crops on record for Canada. The wheat yield of Alberta, 149,125,000, is especially excellent, being more than double that of 1927.

The average yields in bushels per acre for the whole of Canada in 1928, with last year's averages given in brackets, are reported as follows: Fall wheat 24 1/2 (21 1/4); spring wheat, 20 1/2 (17 3/4); all wheat, 20 1/2 (17 3/4). Oats, 29 (23 1/2); barley, 23 1/2 (20 1/2); fall rye, 19 1/2 (15 1/2); spring rye, 18 1/2 (15 1/2); flax seed, 11 (8 1/2).

For the three prairie provinces the preliminary estimates in bushels are as follows: Wheat, 446,775,000; oats, 554,476,000; barley, 62,445,000; rye, 25,711,000; flax seed, 6,832,000.

By provinces the yields are: Manitoba: Wheat, 38,636,000; oats, 67,711,000; barley, 20,351,000; rye, 5,218,000; flax seed, 1,486,000.

Saskatchewan: Wheat, 259,017,000; oats, 197,068,000; barley, 20,013,000; rye, 11,875,000; flax seed, 5,239,000.

Alberta: Wheat, 149,125,000; oats, 87,697,000; barley, 12,087,000; rye, 7,918,000; flax seed, 128,000.

Great Fascination In Cable Repairing

Queer Things Brought On Board By Grappling Operations. There has sailed from an English port a new cable-laying ship belonging to the Eastern Telegraph Company, to take up a position in the Red Sea.

In these days cables are accepted as so much a part of our everyday life that few realize the fascination of the life on board. During grappling operations not only is the cable brought on board ship, but all sorts and conditions of marine growth. Off the coast of Spain recently two tons of oysters were hauled on board an Eastern Telegraph Company's boat, and had to be backed off the cable before the repair could be effected; on another occasion in the Gulf of Suez the cable was brought up coiled round the body of a small whale.

Sponges, coral, and fishing nets and all sorts of shellfish are brought to the surface, and the refuse of civilization brought down the rivers into the sea has been picked up as far as five hundred miles from the nearest land.

The ships are especially equipped to take soundings which are reported to the Hydrographic Department of the Admiralty. In recent years practically all the deep-sea soundings all over the globe have been supplied by cable vessels.

Australian's Novel Request

Wealthy Stockman Left Fond For "Old Woman" Prize

A wealthy stockman died recently, Peter Mitchell, who in his will left a fund for the "Idol woman." Prizes are to be distributed from time to time.

The conditions for competitors are that they must be unmarried, not over 29, of British descent and residing in Australia. They must not be the offspring of first cousins. The woman who is to win the prize must be cheerful and bright in disposition.

"She must cut a good figure on horseback, and swim with good practice, be intellectually as well as physically well equipped, and she is required to have a wide range of knowledge, including the following subjects: History of the British Empire; geography of Australia; elementary anatomy and physiology; proficiency in first aid; practical housekeeping and domestic economy."

One Engine Every Hour

Baldwin Locomotive Works Smash All Records for Production

All records for locomotive production were smashed when 21 locomotives, among the largest type produced in America, left the Eddystone plant of the Baldwin Locomotive works between 5 a.m. Saturday and 11 a.m. Sunday, the company announced. The huge engines were turned out at the rate of one every hour.

They weighed from 250,000 to 400,000 pounds. Six were sent to the Pennsylvania Railroad, eight to the Illinois Central, while the remainder were shipped to other roads throughout the country with exception of four designed for export trade.

Counterfeiting fell off 50 per cent at the reduction of the process of putting silk threads in banknotes.

BY SAD SEA WAVES—THE BATHING GIRL

By PEGGY.

Color is rampant in sky and sea and costume. And while nature has a way of repeating its brilliancies season after season, we cannot remember a year when bathing suits have been more resplendent or of such variety.

And ribbon is almost as noticeable in mermaid realms as it is in any other. Truth to tell, fashion resorts to little short of the spectacular in black and gold—and you can understand its "striking effect" upon innocent and interested bystanders. As if all this color were not enough, its designer has girdled it in wide satin ribbon, tying the latter in a smart bow at the side and has complimented the suit with a cunning and vastly becoming cap of ribbon, balancing the girlish right-sided bow with a bow over the left ear.

And notice, if you please, the ribs of the parasol—ribbon twined they are. But—

Will mildy go near the water?

Doleful

Joan—"Must say she puts her very heart into her cooking."

John—"She must have been very hearty when she made this cake."

Hi-Bits.

Laundryman—"I am sorry to have to tell you, sir, that one of your shirts is lost."

Customer—"But, here, I have just paid you for doing it up."

Laundryman—"Quite right, sir. We laundered it before we lost it!"

The average daily wage of the French laborer is about 14 francs.

Canadian Fruit Exhibition for England

It is announced by the Dominion Fruit Commissioner that arrangements have been completed for a Government exhibit of fruit at the Imperial Fruit Show to be held in Manchester, England, during the week commencing October 26.

Fruit inspectors of the Dominion Department of Agriculture are visiting orchards in different parts of Canada with a view to the selection of the specimens of export varieties that will be put on display.

"Jack says I'm something to adore."

"Does he mean that you're a belle or a knocker?"

THE BROWNES had been tremendously interested in Stella's account of her visit to her cousin, Pearl, the Wishing Fairy at the End-of-the-Sea, and in the Puffer that she had described. In fact, they talked for quite a long time about this strange little fish and its amazing power to puff itself up until it looks quite large and terrifying. Pimble was particularly amused when he heard of the valve that it has in its throat that makes it possible for it to retain the air it has sucked itself up with, even though it may be tossed around.

As long as they were discussing the Puffer I must tell you of an experience I had with one. I found a Puffer on the sand of New York Bay one summer. It was all puffed up and though alive seemed to have been washed ashore and to be quite helpless. I wondered what could be the matter, so decided to investigate. The poor Puffer seemed to be in terrible distress, and after carefully examining it I saw that a small comb about an inch long with a gold edge (the kind women sometimes wear in their hair) was lodged deep down in its throat. I finally managed to get the tiny comb out and threw the Puffer back into the water, when I saw it immediately blow the air that was distending it away. I suppose the comb had been in some way interfered with the throat valve and had prevented it from charging the air. In any case, I have the comb and the Puffer is a much happier and a much wiser Puffer! It had probably been attracted by the gleaming bit of gold in the comb and had been ship to eat, had greedily gulped it down. But to go back to Stella and her Brownies.

"I have brought you a present from Pearl," the Fairy said, when they had ended discussing Puffers. The Brownies crowded about to see what it might

be and seemed so disappointed when they saw what looked like a small and faded bunch of celery that Stella burst out laughing.

"I told you about Sea Anemones," she said, "and your trip under the sea you saw them growing on the floor of the ocean. You saw their long, graceful tendrils and their changing colors. This poor little thing is an Anemone, and let's go and put it in one of our pools."

"But it won't live!" cried Pimble. "It is used to salt water."

"Of course it is used to salt water, Pim, dear," and Stella smiled, "but what kind of Wishing Fairies do you think Pearl and I are if we can't use our power to make this particular Anemone feel perfectly at home in our magic pool? That," she added with a laugh, "has all been attended to. Come, let's put it in the Gel Big Foot."

The Brownies skipped, hopped and jumped toward the pool and all four of them leaped expertly over the edge and looked in as Stella gently dropped the Anemone in the water.

As soon as it touched bottom it firmly fastened itself on to the bottom and its long tendrils stretched out and began waving around every which way and changed from one iridescent tint to another. It really was a very beautiful and looked like some glorious moving water flower.

"See," exclaimed the Fairy, "we have an excellent view of its mouth which is right on top of its body, and in the center of all its waving arms. They, as you see, radiate from a little circle, and we can also plainly see how the Anemone draws in water and ejects it. Each time it does this it absorbs tiny bits of food from the water. Our little animal flower is truly a wonderful as well as an exquisite pet."

Frenchman Anxious To Clear His Name

Man 82 Making Fourth Attempt to Have Conviction Quashed

In the early twenties the papers of Paris were filled with the Darnal poisoning case. A young chemist of that name had married a beautiful girl of 30; according to the neighbors, they frequently quarreled; then, after a brief illness, the wife died; her body was buried and exhumed and a small quantity of arsenic found. So the husband was arrested, and after a long, tragic trial, condemned to penal servitude for life.

In 1907, having served twenty-four years, he was pardoned by President Loubet and since then has tried to have his conviction quashed. As a professional chemist he contended that the arsenic found in his wife's body was not sufficient to cause his wife's death, unless it had been received on an empty stomach, which he was able to prove at the trial, was not the case; also, that the most approved investigations had established the fact that the bodies of all persons contain more or less arsenic, and that the normal amount did not exceed that found in his wife's body.

On these grounds, fortified with a heap of scientific evidence, he sought an appeal in 1906 and again in 1910. In both instances his appeals were rejected on the ground that he had not sufficiently established "a new fact unknown at the time of the trial." Now, at the age of 82, he is making his third appeal, based on a report of the Academie des Medecins which seems to bear out his contention as to the arsenic which may be normally secreted in the latestest without injury. His appeal has been granted by the Minister of Justice, who has nominated a committee of medical men to report on the subject. Should their report be favorable, his case will go before the Cour de Cassation for final adjudication.

Gypsum Production In Canada

Over Thirty-Nine Thousand Tons Produced in Manitoba

Reporting upon gypsum production in Canada for 1922 the Dominion Bureau of Statistics shows that shipments of all grades reached a total of 559,265 tons, valued at \$2,160,838, an increase of 172,175 tons and \$735,460 over the figures for 1921. The quantity quarried by provinces was: Nova Scotia, 281,861 tons; New Brunswick, 56,692 tons; Ontario, 106,829 tons; Manitoba, 39,147 tons; and British Columbia, 10 tons.

Workman (to manager)—"Any chance of a job, sir?"

Manager—"Well, there's a man here today and he hasn't turned up. If he doesn't come tomorrow, I'll send him home and you can have his job!"

—Pearson's Weekly.

Glow Worms Foretell Storm

Glow worms are more brilliant when a storm is coming than at other seasons. Like many other mysteries of nature this curious circumstance has never been explained.

"YOUR TEETH"

TEMPORARY TEETH—WHEN THEY ARE ABSCESSED

Dr. Ross, Professor of Medicine, M.B., D.D.S., Pittsburgh, Pa.

If you had a pet rattlesnake around the house it might not do you any harm, but of course you could not reach an agreement upon that subject with the limited brain power of the snake and so you would be taking a big chance that the armistice would be broken.

Your child could have one or even several abscessed temporary teeth with no apparent injury to his general health, but what assurance have you that the apparently harmless collection of pus in not poisoning the child?

When the abscess really strikes and becomes acute, then there is no question about the damage it does.

Then abscesses may not only cause rheumatism and heart inflammations but the eyes and kidneys and any or all of the bodily structures may be attacked.

When a temporary tooth abscess burrows down the inside of the jaw and gets behind one of the protective walls of fibrous material that separates the layers of muscle in the neck, we call the germyl fascias, a very serious infection develops which is frequently fatal.

In order to save the life of a child a very delicate operation must be performed, and that quickly. Don't take chances with abscesses of the temporary teeth. They are not only very dangerous, but the abscessed teeth cannot be used and the good teeth are not allowed to do their work because one tender spot in the mouth will interfere with chewing.

Of course, the best plan to avoid abscesses of the baby teeth is to take good care of children's teeth from the day they appear.

This is the easy method and it is also the safe and sure method. Therefore it is the common sense method. Begin at the beginning. Later may be too late.

Superstitious About Yawning

Hindu Repeats Name of Deity to Prevent Misfortune

There are a number of odd superstitions with regard to yawning. Most people remember having been corrected at some time or other for not placing a hand over the mouth to cover up yawns.

This arose from a quaint belief of years ago when people were more superstitious than they are today—that there was a danger of the devil jumping into the open mouth when in the act of yawning.

Among many races it is still believed, he who yawns much is possessed of an evil spirit. When a Hindu yawns, he snaps his thumbs and repeats the name of one of his deities.

To neglect this means misfortune. When a Muslim yawns, he turns the back of his head toward the open mouth and says, "I seek refuge in Allah from Satan."

To yawn in the midst of prayers is considered a bad omen. It is better, according to ancient superstition, to recite a prayer again, from the beginning.

Why He Succeeded

Five Things Responsible for Farmer's Large Profit

Not long ago a well-known farmer was asked to state the five things most responsible for the rather large profits resulting from his farming operations each year. He gave the following:

1. Diversification—having more than one money crop each year to insure against bad market conditions which might exist with any one crop.
2. Quality production—producing only the grade of products for which the public will pay the highest price.
3. Intelligent management—keeping expenses low by careful buying and then making thoughtful use of capital and labor on the farm.
4. Volume in selling—having a supply large enough to command a good buyer, this volume being secured by having fertile, high-yielding seed and high grade livestock.
5. Conservatism—that is, staying with one type of farming year in and year out regardless of temporary conditions and then playing safe in all business deals, especially when it comes to the investment of money.

Conjugal Faith

Seeing a colored man of his acquaintance starting off on a fishing excursion, a gentleman thought it an excellent time to reproach him for his laziness.

"Tom, you old loafer," said he, "do you think it right to leave your wife at the wash tub while you pass your time fishing?"

"Yes," replied the colored man, "I'm right. What wife does you see? As hard as I was dera."—Harper's Magazine.

The End-of-the-Sea Fairy Sends Stella's Brownies a Present.

THE BROWNES had been tremendously interested in Stella's account of her visit to her cousin, Pearl, the Wishing Fairy at the End-of-the-Sea, and in the Puffer that she had described. In fact, they talked for quite a long time about this strange little fish and its amazing power to puff itself up until it looks quite large and terrifying. Pimble was particularly amused when he heard of the valve that it has in its throat that makes it possible for it to retain the air it has sucked itself up with, even though it may be tossed around.

As long as they were discussing the Puffer I must tell you of an experience I had with one. I found a Puffer on the sand of New York Bay one summer. It was all puffed up and though alive seemed to have been washed ashore and to be quite helpless. I wondered what could be the matter, so decided to investigate. The poor Puffer seemed to be in terrible distress, and after carefully examining it I saw that a small comb about an inch long with a gold edge (the kind women sometimes wear in their hair) was lodged deep down in its throat. I finally managed to get the tiny comb out and threw the Puffer back into the water, when I saw it immediately blow the air that was distending it away. I suppose the comb had been in some way interfered with the throat valve and had prevented it from charging the air. In any case, I have the comb and the Puffer is a much happier and a much wiser Puffer! It had probably been attracted by the gleaming bit of gold in the comb and had been ship to eat, had greedily gulped it down. But to go back to Stella and her Brownies.

"I have brought you a present from Pearl," the Fairy said, when they had ended discussing Puffers. The Brownies crowded about to see what it might

be and seemed so disappointed when they saw what looked like a small and faded bunch of celery that Stella burst out laughing.

"I told you about Sea Anemones," she said, "and your trip under the sea you saw them growing on the floor of the ocean. You saw their long, graceful tendrils and their changing colors. This poor little thing is an Anemone, and let's go and put it in one of our pools."

"But it won't live!" cried Pimble. "It is used to salt water."

"Of course it is used to salt water, Pim, dear," and Stella smiled, "but what kind of Wishing Fairies do you think Pearl and I are if we can't use our power to make this particular Anemone feel perfectly at home in our magic pool? That," she added with a laugh, "has all been attended to. Come, let's put it in the Gel Big Foot."

The Brownies skipped, hopped and jumped toward the pool and all four of them leaped expertly over the edge and looked in as Stella gently dropped the Anemone in the water.

As soon as it touched bottom it firmly fastened itself on to the bottom and its long tendrils stretched out and began waving around every which way and changed from one iridescent tint to another. It really was a very beautiful and looked like some glorious moving water flower.

"See," exclaimed the Fairy, "we have an excellent view of its mouth which is right on top of its body, and in the center of all its waving arms. They, as you see, radiate from a little circle, and we can also plainly see how the Anemone draws in water and ejects it. Each time it does this it absorbs tiny bits of food from the water. Our little animal flower is truly a wonderful as well as an exquisite pet."

Put Egan has resigned from the police force at Lethbridge.

A Michel butcher is to open up a meat market in Blairmore next week.

TO NEW SUBSCRIBERS—The Blairmore Enterprise from now till December 31st, 1934, for two dollars.

GENERAL CHANGE

TRAIN SERVICE

Effective Sunday,

September 30th, 1933

Times for Trains at Blairmore will be

Westbound	Daily	Eastbound
No. 67 8.20 a.m.	No. 68 10.45 p.m.	
Westbound	Eastbound	
Mon. Wed. Fri. 7.15 a.m.	Tues. Thurs. Sat. 10.01 a.m.	
No. 535 3.00 p.m.	No. 536 10.01 a.m.	

TRANS-CANADA LIMITED, Nos. 7 and 8, between Montreal, Toronto and Vancouver, will be withdrawn. Last trains leave each of these points on September 29th, 1933.

THE MOUNTAINEER, Trains Nos. 13 and 14, between Chicago and Vancouver, have been withdrawn west of Moose Jaw. Connections at Moose Jaw from and to St. Paul with Trains Nos. 1 and 2.

For further particulars apply to any Ticket Agent.

DEATH OF MRS. ADA ELTON

At Bournemouth, England, on

August 25, Ada Elton, aged 79, wid-

ow of the late Lieut-General Robert

William Elton, Bengal Army, India,

and mother of E. A. Elton, Calgary,

Mrs. John Kemmis and Cecil Elton,

both of Cowley, Alta., and Ralph

Elton, of Similkameen, B. C.

Mrs. Elton was an old-timer, hav-

ing come out to Alberta 3 years ago

with her daughter, to join her hus-

band and sons, who had come out

some time previously.

Last February, Mrs. Elton went

back to England to see her brothers

and sister, intending to return to Al-

berta on the 15th day of September,

but while visiting her brother in

Bournemouth, passed away peacefully

but suddenly early Saturday morning,

August 25th.—Pineher Creek Echo.

HILLCREST HAPPENINGS

(From Our Own Dear Felix)

Mr. and Mrs. T. Baybutt are at pre-

sent enjoying a visit to Calgary.

Mrs. John Ironmonger and children

left on Sunday night's train on a vis-

it to England.

Miss Stucky, of Innisfail, has ac-

cepted the position as nurse at the

local hospital.

Mrs. T. O. Davies and children re-

turned a few days ago, after an ex-

tended visit to Wales.

Miss Nellie Royle is improving very

nearly but it will be some time be-

fore she can leave the hospital.

Mrs. D. Howcroft and children, who

left here on September 10th for the

Coast, have decided to reside there

permanently.

W. Yates and family left on Sun-

day night's train for the Old Country,

with intention of residing there per-

manently.

The very creditable sum of \$152

was raised by the ladies of the church

at the sale of cooking, etc., held last

Saturday. This will go towards wip-

ing off the debt on the manse.

Turtle Mountain Lodge, No. 15,

Knights of Pythias, have purchased

the John Dragon property, adjoining

the P. Burns premises, and intend

converting same into a first-class

lodge hall.

Mr. and Mrs. R. Price, who left

here the early part of the year to

seek fame and fortune, returned rat-

her unexpectedly a few days ago.

They have purchased the residence of

W. Yates and intend residing in Hill-

crest.

The road from the bridge to Hill-

crest is one of the best in the prov-

ince. It would do Mr. Ross, minister

of public works, no harm to make a

run down from Edmonton and have a

good look at it. He might get some

pointers. After seeing this he should

also visit Blairmore where all gov-

ernment artillery has been at work.

Now that Bellevue has decided to

have a covered skating rink, to be

ready for the coming season, the

question arises as to what Hillcrest

is going to do about it. It is to be

hoped that the committee that was

appointed some time ago to go fully

into the matter, to collect data and

plans and then report, will call a pub-

lic meeting and test the feelings of

the residents.

Several cases of shop-lifting have

been reported to the police of late.

Among them was the entering of two

poolrooms, where cigarettes and other

goods were stolen. Also a couple

of the government's pet devices—the

slot machines—were broken up and

the coins taken therefrom. It is

about time a police officer was sta-

tioned here. It is a common occur-

rence to see boys and girls of tender

years on the streets long after 9 p.

m. and people are asking what the

probation officer is doing about it.

The well known Miami farm, near

Lethbridge, which has been noted for

its successful crop production for the

past ten years or more, has been sold

to a colony of Huttenites for \$250,

000.

Geographical Conditions

It is announced in the daily press that the proposal to introduce Alberta coal into the markets of Ontario has been dropped, the plan having been found impossible owing to geographical conditions and the long haul. The exportable freight rate of seven dollars per ton granted by the Canadian National Railways was not a profitable one from a railway standpoint. An Eastern man is reported as saying: "There is no question about it, the death knell has been sounded to the possibility of bringing Alberta coal to Ontario in competition with Pennsylvania anthracite in normal conditions and at normal prices."

This announcement is of great national importance and is bound to have a profound effect upon future considerations of grave economic factors in this country. It is certainly disappointing to the West, and to Alberta in particular, where high hopes were entertained that a large market for Alberta coal could be built up in Eastern Canada.

Those, too, who are anxious to see Canada become more and more a self-supporting country are grievously disappointed. Instead of sending tens of millions of dollars annually into the United States for coal, thus adding generously to our imports and swelling the adverse balance of trade between the Dominion and the Republic, it was hoped that this money could be kept at home, paid out in wages to Canadian miners and assist in the development of Canada's natural resources.

But it is not to be. Why? Because of geographical conditions. In other words, because of the long and expensive haul from the West to the East, and the East will not pay the price. It is easier for Ontario to continue buying in the United States, and as there is no Canadian tariff imposed upon Pennsylvania anthracite coal the good people of Ontario can buy it just as cheaply as the people of the United States. Coal is one thing in regard to which the Ontario manufacturer, and Ontario people generally, are ardent free traders.

The fact that Ontario has been made to realize in the matter of coal that geographical conditions must be recognized, and that trade cannot "willy nilly" be forced over geographical barriers, that, in a word, geographical conditions have a very direct bearing in economics, will, it is to be hoped, open the eyes of Eastern people to the fact that the West has to struggle against those same barriers, and pay the price, on every carload of freight from Ontario to the prairies.

Ontario is not denied the right to obtain its coal supplies from its nearest and cheapest market, the United States. Nor is any customs duty imposed upon them in so doing thus forcing them to pay more than the actual market value of the coal.

But when it comes to consideration of the question of allowing the people of the West to buy, or even to sell, in their nearest and most advantageous market, Ontario objects most strenuously and declares that in the interests of Canada's national development and prosperity, Canadians must buy "made in Canada" commodities, and traffic must be kept in Canadian channels regardless of the cost of the geographical difficulties to be overcome, and the over-coming of which the West is called upon to pay.

If the Ontario manufacturer really and truly believes that it is essential above all things that Canadian industries should be developed and prosper, and to that end should be protected by a tariff wall, then he should not be willing to give a voluntary preference to Canadian coal, but he should prove his constancy by appealing to the Dominion Government to impose a duty on United States coal sufficiently high to enable Alberta coal to be shipped to Ontario and sold there on terms of fair competition with the United States product.

There is an old saying that what is sauce for the goose is sauce for the gander. Whether the East is prepared to admit this may be open to question, but it is inevitable that the outcome of this experiment to place Alberta coal on the Ontario market is going to have the effect of further arousing Western people to a knowledge of the handicaps under which their labor and to an even fuller realization of what many regard as an injustice, because of the recognized inequality of treatment accorded East and West based on the geographical conditions which exist in this Dominion.

The Electrical Age

Canada Leads the World in Percent-
age of People Who Use Current

A recent compilation of statistics on the use of electricity shows that the Dominion of Canada leads the world in percentage of people who use current. Canada's percentage is given as 25.3, while that of the United States is 26.5. Japan 21.9, while Switzerland has the highest for continental Europe. Perhaps no place on the continent is better physically equipped for the development of electrical power than British Columbia. Countries with natural waterpower have huge advantages in the use of electrical current. The story told by the figures is of constant increase year by year. The electrical age is only dawning. Another decade may well double these percentages and the number of people benefited.—The Vancouver Province.

Women's umbrellas, lost by their owners while travelling abroad, reach police headquarters in London at the rate of over 200 a day.

Britain Settles Another Debt

Pays U.S. Treasury Last Installment
On Purchase of Silver

The British Government has wiped out the obligation it incurred at Washington through the purchase of silver for use as a major coinage in India during the war. It paid to the United States treasury \$31,085,000 as the last installment of principal and interest on an original borrowing of \$132,000,000.

Exhibition Train Appeals to People
The success of the Canadian travelling exhibition which is touring France, has drawn from M. Dalpaz, President of the Compagnie Generale Transatlantique, an expression of opinion that the day of stationery exhibitions is over. The exhibition train, he says, goes to the people themselves and thus makes a direct business appeal.

A complaint always passes for more than its face value.

Nerves So Bad That She Would Sit and Cry

Mrs. Mary Hocking, Madoc, Ont., writes:—

"Dr. Chase's Nerve Food has done me a wonderful lot of good. I suffered from nervousness and was so run down and my heart and nerves were in such bad shape that I would sit down and cry and not know what I was crying about. I also used to have weak spells. Thanks to Dr. Chase's Nerve Food, however, I am real well now. I shall always keep a box of the Nerve Food in the house, and recommend them to my friends, they are a wonderful medicine." (Mr. J. W. Vance, Druggist, at Madoc, Ont., says: "I have sold Mrs. Hocking your Nerve Food, and the medicine has done her much good.")

A Pity For France

Comment on Britain's Promise to Pay
U.S. Debt in Gold

Naturally the Temps declares that the fatal mistake of Great Britain was to promise to pay the United States in gold. Probably nothing Britain ever has done has won more considerable respect in the United States than that selfsame promise to repay in gold what she had borrowed, and that, with reference to collecting what, in turn, was due her. France, as the Temps might have pointed out, certainly has steeled wide Britain's "blunder." Which probably is a pity for France.—Detroit News.

Separation, But No Alimony

A peaceful, quiet separation, no damage done, everybody happy again—that's the situation when you divorce your alma. Try Putnam's Corn Extractor. Act like magic. No pain, no failure, success every time. Refuse a substitute for "Putnam's," see where.

Presidents of English Descent

Of the twenty-nine men who have served the United States as President sixteen have been of English descent. Scotch and Scottish mixtures follow closely in second place and there have been two of Dutch ancestry. Jefferson was of Welsh descent. The late Warren G. Harding was of Scottish-Dutch descent and President Coolidge can boast of English ancestry.

GUARD THE BABY AGAINST COLDS

To guard the baby against colds, not only eat equal Baby's Own Tablets. The Tablets are a mild laxative that will keep the little one's stomach and bowels working regularly. It is a recognized fact that where the stomach and bowels are in good order that colds will not exist; that the health of the little one will be good and that he will thrive and be happy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Phonetic Writing in Baffin Land

People Quickly Mastered System
Invented by Canadian Missionary

To recently the natives of Baffin Land had no system of writing. But now a Canadian missionary has invented for their benefit a species of phonetic writing. Each character represents a syllable; hence no spelling is required. This curiously simple system was quickly mastered by the Baffinlanders, who now freely write letters to their friends and hand them over for delivery to anyone taking a journey in the desired direction. The letters always reach their destination, because the people at the little sleeping place invariably read them all through. In this way, it is a letter happens to get lost, the addressee receives the message by word of mouth.

Modern Chivalry

People Continually Doing Acts Requir-
ing Courage and Heroism

Peace has its roll of honor no less than war. A shellfish collector, flings off his coat and dashes into the sea to help a victim swimmer in distress, losing his life in saving him. A boy of eight jumps into a river and with a splendid effort brings his little sister safely to the bank. A one-armed man, tired, dressed, swims 50 yards, reaches a drowning girl, and supports her till a second rescuer brings a lifeboat. An engine driver stops his train, runs back to the place where he had seen a man on the point of drowning, plunges in, clothes and all, and brings him safely. Is the age of chivalry dead?—London Daily Mail.

It Will Prevent Uricated Throat.—At the first symptoms of sore throat, which presages diphtheria and inflammation, take a spoonful of Dr. Thomas' Electric Oil. Add a little sugar to it to make it palatable. It will allay the irritation and prevent the ulceration and swelling that are so painful. Those who were periodical subjects to quinsy have thus made themselves immune to attack.

British Railwaymen Visit Canada

Are Studying Transportation Method
Used in This Country

Several of the chief officials of the Great Western Railway of England are visiting the most important ports in Canada and the United States, with a view to studying the arrangements and appliances used for the shipment of coal, grain, etc. The itinerary includes a visit to Seattle, Seattle, Port Arthur, Fort William, Chicago and other lake ports; Baltimore, Washington and Hampton Roads ports, Virginia.

A cautious sense of proportion is one of the main differences between a wise man and a fool.—Lord Morley.

Whales are subject to barnacles, but of a different variety than those which grow on ships.

Women Dye Faded

Things New Again

Dye or Tint any Worn, Shabby

Diamond Dyes

Each 15-cent package of "Diamond Dyes" contains directions so simple that any woman can dye or tint any old, worn, faded thing new, even if she has never dyed before. Choose any color at drug store.

The Vitality Of Seeds

Wonderful Powers of Endurance Are
Provided by Nature.

Nature does amazing works of enabling her children to survive extraordinary hardships. None of her creations has more wonderful powers of endurance than the seed by means of which plant life is carried on.

You may subject certain seeds for hours to a temperature of 100 degrees, and when they are put in the soil, they will still grow. You may heat them until they are hot enough to burn your hand, yet they will not lose their vitality.

In America huge fires sometimes rage through the forests, destroying life after mile of giant trees. Where the fire has passed there remains nothing apparently, but charred stumps, flame-scarred, smouldering soil. Yet within a few months the whole district will be green with the first leaves of its seedling trees.

When seeds were made recently to discover the heat at ground-level during a forest fire it was found that it was from 1,500 to 1,600 degrees Fahrenheit. The fires move so quickly that this intense heat lasts only for a minute or two at any spot.

Various tree seeds were then tried to see what heat they could resist. It was found that fir cones could withstand a temperature of 1,200 degrees Fahrenheit for eight minutes without losing their vitality.

HER BABY SUFFERED WITH SUMMER COMPLAINT

A fact mothers must face is that summer complaint with the prostration, often verging on collapse, which sometimes accompanies this disease makes it one of the most serious and dangerous to contend with during the hot months.

"Thousands of infants die annually whose lives could have no doubt been saved by the timely use of Dr. Fowler's Extract of Wild Strawberry, and it has been the experience of thousands of mothers during the past 75 years this valuable preparation has been on the market, that it is the safest and most effective remedy for use in all cases of looseness of the bowels."

S. S. LaFontaine, Great Desert, Ont., writes:—"My baby, when a year old, was suffering with summer complaint. Two doctors attended him, but nothing would stop the vomiting and diarrhoea. A friend told me to try Dr. Fowler's Extract of Wild Strawberry and after the second dose the baby was better and I can say it saved my little one. I would not be without a bottle of Dr. Fowler's in the house for untold reasons."

Price 50¢ a bottle; put up only in the T. Milburn Co., Limited, Toronto, Ont.

Annual Salmon Pack

1923 Pack Estimated at 626,266
Cases

The Canadian Department of Fisheries announces that the estimated British Columbia salmon pack for 1923 season amounts to 626,266 cases. District No. 1, the Fraser River waters, has a total pack of 15,640 cases, while District No. 2, comprising Naas River, Skeena River, Rivers Inlet and Smith Inlet, Bella Coola and Kitimat and other points in that vicinity, has a pack of 561,741 cases. District No. 3, the Alert Bay district, Vancouver Island waters and mainland waters directly opposite, contributed 44,579 cases to the total.

Minard's Liniment For Headache

Barnardo Children Coming
One hundred and fifty child emigrants from Dr. Barnardo's home, of an average age of 12 years, are sailing to Canada where homes have already been prepared for them. This will be the last party to leave the home for overseas this year.

WARTS

Minard's, applied frequently, dries up and removes Warts.

Vitamins in Common Foods

Almost All Common Foods Contain
Elements Essential to Health

Science does not tell us what vitamins are, any more than it tells us what electricity actually is. But medical men are agreed that they are vital elements, and that a sufficient supply of them is essential to normal health, energy, endurance and disease-resistance. Vitamins are still classified as A, B and C, with a sub-section D, a co-worker with vitamin A in the prevention and cure of rickets in children.

Vitamin A is called the fat-soluble because it dissolves in fat. It is found in the fatty or oil-matter of fresh meats, in green and yellow vegetables, in milk, butter and cream, eggs, yolks, and especially in cod-liver oil. This vitamin is indispensable for the growth of body tissues and maintenance of general health.

Vitamin B is the business partner of A, assisting in body-building, supplying nerve forces and accelerating metabolism. It is abundant in yeast. Vitamin C prevents bone-malnutrition. It is essential to growth, body tone and preservation of the teeth and their enamel.

All fresh meats are definitely known to contain ample supplies of vitamins for good health in old and young who consume them, while over eighty articles of everyday food have one or more of the three classes of vitamins.

A single lettuce leaf, for instance, is said to contain millions. In fact, no common are they that it is almost impossible to make up a mixed meal which does not supply all the vitamins the human body needs.

Reconstruction In Devastated Japan

Reported that Free Entertainment
Will be Provided for the Masses

A dispatch from Tokyo says that Home Minister Coto has announced he will have theatres and motion picture houses built in the devastated region to provide free entertainment for the people this winter, as a means of diverting their minds from the earthquake and of relieving the monotony of their lives.

He had an extraordinary session of the diet will be convened in October to vote funds necessary for reconstruction of the capital.

Hiro Takaraki, Minister of the Navy, estimates the loss to naval ports as a result of the quake at 500,000,000 yen (\$250,000,000).

Rub it in for Lame Back.—A brisk rubbing with Dr. Thomas' Electric Oil will relieve lame back. The oil will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. It is the liniment slaker in the pain comes out and there are ample grounds for saying that it is an excellent remedy.

An infatuation then for collars has been invented with each thread of the fabric so treated to resist stains and dirt that they do not penetrate, making the collars easily cleaned.

Minard's Liniment For Corns

Hern.—"Isn't this a stupid party?"

Hern.—"Yes, but it's a good one."

Hern.—"Why not let me take you home?"

Hern.—"Sorry. I live here."

Law Enforcement

Loose Method of Administration of
Criminal Law in U.S.

The report of the American Bar Association's Special Committee in Law Enforcement strongly reiterates a fact disgraceful to the people of the United States, yet about which they seem to manifest little concern. The administration of the criminal law is ineffective. Crime is growing faster than population. Criminal justice is neither speedy, certain nor final. Comparison with long-settled countries like England and France may not be fair in all respects, but the American excess in violent crime is monstrous.

This in England and Wales, in 1921, there were 62 murders; in Chicago, 137; in New York, 340; in London, 137. In 1922, there were but 47 so-called murders. Only nine of them were such as would justify here an indictment for murder in the first degree. There was not a single murder "mystery." The perpetrator of every murder was found.—The N.Y. Times.

ADIES WANTED—TO DO PLAIN

La and light sewing at home. Whole years time. Good pay. Work sent any distance. Charges paid. Send stamp for particulars. National Manufacturing Co., Montreal.

MONEY ORDERS

Buy your out of town supplies with the latest Express Money Order. Free delivery. Cash three cents.

AGENTS WANTED

AGENTS OPPORTUNITY. REAL half nets sell easily. Send ten cents for full samples. Free proposition, liberal commission. Dorothy Hair Net Co., Lindsay Building, Montreal.

ADIES WANTED—TO DO PLAIN

La and light sewing at home. Whole years time. Good pay. Work sent any distance. Charges paid. Send stamp for particulars. National Manufacturing Co., Montreal.

KENDALL'S

Keep Kendall's always in the house. A strained muscle, a sprung tendon, a joint or a knock demands immediate attention. A few hours' delay will result in a long lameness—perhaps in the loss of the horse. Kendall's Spavin Treatment saves more horses than all the other known remedies. Under the name of Kendall's Spavin Cure, it is the forty-year-old standby of horsemen, lamers and veterinarians.

Get a bottle of Kendall's today. Ask for it, for the Free Book or write for it to DR. B. J. KENDALL COMPANY, CROSSING FALLS, Vt., U.S.A.

Organizations Planning To Provide Work For Immigrant Harvesters

Baskatoon.—Providing that the British harvesters who came to Canada for the harvest season really desire to stay in the Dominion and become Canadian citizens, the conference of Boards of Trade, Governments and farmers' organizations of the three prairie provinces, held here, decided to do all in its power to enable them to do so.

After a discussion lasting several hours, early in which it became apparent that the problem presented was not so much the fact as to whether or not the immigrant harvesters who wished to remain in Canada could be retained, but the question as to whether or not employment could be found for them during the winter months, it was decided that they should stay, the following resolution was adopted unanimously:

"Resolved: That this conference endorse the action of the Canadian Colonization Association in calling such a conference, that this conference go on record as being in favor of requesting the Employment Service of Canada, assisted by the Canadian Colonization Association and other organizations represented at this conference, to utilize every available method to bring employer and employee together, and, further, in view of existing economic conditions, to emphasize the importance of having as many as possible of those now engaged in agricultural pursuits to continue at such, and that representatives of all organizations here represented and all others interested undertake to bring this resolution to the attention of their respective organizations and to endeavor to secure their co-operation; that a co-ordinating committee be appointed, consisting of the Canadian Colonization Association, the railways, the Federal Department of Labor and Immigration and the Canadian Council of Agriculture, to co-operate and assist in this undertaking."

The fact was early brought out that a very large percentage of the British harvesters were married men, with wives and families in England. Many of these, it was said, had been out of work in the Old Country for a long time, and asked nothing better than that they could procure work during the coming winter in Canada, at a wage which would permit of their supporting their dependents at home, and with the probable prospect of bringing those dependents out here to join them in the very near future.

Charles F. Roland, representative of the Employers' Association of Manitoba, suggested that the Governments and railways plan their 1924 expenditures in a manner to permit as much work as possible being done during the winter, thus absorbing such of those men as could not support their wives and families in the Old Country on the wages that the farmers could afford to pay. The farmers of the west, it was thought, could absorb the remainder providing the men were willing to work at a price the farmer could afford to pay.

Government Buys Cattle
Montreal.—Federal and Provincial Departments of Agriculture co-operated in the purchase in the British Isles of a large stock of horses, swine and sheep, including sheep belonging to the King, which arrived here on the steamer Garcla.

State Department officials view the British communication as leaving open the possibility of negotiating a double-barreled treaty to curb run running and also to facilitate legitimate liquor shipments in foreign bottoms. There was no attempt, however, to disguise the fact that the British Government had indicated general disapproval of the plan and raised objections against it.

The British note is said to have

One Hundred Thousand Perish

Late Reports of Japanese Disaster Give Details of Loss of Life
Toronto.—Six Canadians were killed in the Japanese disaster of September 1, according to a cable received by the Toronto Star from Bishop Hamilton of Nagoya.

The fatalities were: P. A. F. Cable, a harvester for the T. Eaton Company; W. W. Watson, manager of the Japanese branch of G. R. Greer & Co., Toronto; the wife and child of T. G. Matland, manager for Japan of the Manufacturers' Life Insurance Company; and H. Reid and S. T. Weir, employees of the Canadian Pacific Railway. The cable states that all the other Canadians in Japan are unharmed.

Bishop Hamilton places the total number killed at "more than a hundred thousand," of whom about 150 were Europeans. He states that two thirds of Tokyo is in ruins and four-fifths of Yokohama has been completely destroyed.

Enforce Dry Law

Ontario Government Says Act Must Be Respected as Long as On the Statute
Toronto.—When the attention of Attorney-General Nicksa was drawn to a press report crediting the Conservative party with an intention to seek a new mandate from the people in connection with a decision to repeal the O.T.A. Hon. Mr. Nicksa said that he thought the position of the Conservative party in relation to the O.T.A. had been made abundantly clear during the last election—that, so long as the act was on the statute books it had to be respected and enforced, and that the voice of the people, expressed by way of referendum, would be necessary before it could be repealed or other legislation substituted.

Less Unemployment at Coast
Vancouver.—At the regular meeting of the Trades and Labor Council, delegates reported that members of the unions were nearly all employed. They also reported increases in wages in some instances. Work has commenced on construction of a new apartment hotel on Georgia Street to cost \$250,000.

Saskatchewan Wheat Yield

Regina, Sask.—Wheat yields in the various crop districts of the province range from 14 to 27 bushels an acre, giving an average yield for the entire province of about 20 bushels, according to the returns appearing in the Saskatchewan Government crop report.

Storm Endangers Shipping

Great Anxiety Felt For Schooners in Behring Sea

Nome, Alaska.—Raging storms are sweeping the Behring Sea coast for a distance of 100 miles eastward and westward of Nome. Grave fears are felt for the schooners Sea Wolf, Silver Wave, Teddy Bear and Nokatak which are overdue more than a week, at Nome from ports to the westward. The schooner Fred J. Wood, owned by A. H. Moore, with a party of gold hunters went ashore in Port Clarence Bay at Telier, 80 miles northeast of Nome. There were no casualties.

Deadline in Wireless Plan

London.—A fresh deadline has arisen in the negotiations with the Marconi Company in connection with the long delayed Imperial wireless scheme, the Daily Telegraph says. The Telegraph suggests that the only way out of the difficulty is to refer the whole matter to the Imperial economic conference.

Cosgrave Again President

Dublin.—William T. Cosgrave was re-elected by the Dail Eireann as President of the Executive Council of the Irish Free State.

World Flight Party Having Hard Luck

May Have to Take Longshoremen's Jobs at Los Angeles

Los Angeles.—The 39 gentlemen-adventurers who arrived here August 25 aboard the yacht Frontiersman on a trail-blazing voyage in the interests of a British seaplane plant around the world next year, were said to face the possibility of becoming longshoremen at Los Angeles harbor. Their yacht has been seized by federal officers for violation of liquor laws and labelled by commercial firms twice for alleged debts and their ship's surgeon has been stricken with malaria fever and now another adventure seems to loom ahead. Many of the men aboard the ship, who signed in all kinds of positions for the adventure of the voyage, are war heroes and they never have worked as longshoremen, but they are said to consider that work as a probability in the near future.

Seed Inspection Bill

Effective October 1

Purchaser Can Get Redress If Quality Is Poor

Ottawa.—An order-in-council has been issued bringing into effect on October 1 the bill respecting the testing, inspection and sale of seeds, passed last session. Under the new act if seeds do not prove up to specified quality the purchaser can get redress. An important provision aims to keep grass and clover seed free from seeds of noxious weeds. It is provided that the seed package shall bear the name and address of the merchant as well as the province and county in which the seeds were grown.

Swiss Farmers For Canada

Victoria, B.C.—Thousands of Swiss farmers are eager to come to Canada if opportunities for settlement here are available for them.

SHEEP BREEDING IN MANITOBA

Sheep breeding is fast becoming an important industry in the Province of Manitoba, and there have been many sheep and lamb shows in various parts of the country this season. One of the most successful shows of this kind was held recently at Riverton, under the auspices of the Dominion Livestock Branch and the Manitoba Department of Agriculture. The upper pictures show four ewes which were exhibited from Arbor. Practically all the woolen goods worn by the townspeople at Riverton, are products of the district, as nearly every home has a carding machine and spinning wheel. W. W. Fraser, Livestock Commissioner for Manitoba, attended the sale and the second picture shows Mr. Fraser and two young ladies of the district carding wool and operating a spinning wheel. Mr. Fraser, incidentally, exhibited a fat lamb which was awarded premier prize. This lamb is shown in picture three, completed with fourteen others of its class. The lower picture is a general view of the entries in the class one pen of twenty fat lambs.

Formal Apology of Greece

Naval Salute of 21 Guns Given Italian Flag

Athens.—A naval salute of 21 guns, constituting Greece's formal apology to Italy for the assassination of the Italian boundary commission near Janina, was given the Italian flag by two Greek cruisers in Phaleron Bay.

An Italian cruiser steamed past the Greek ships and received the salute; British and French ships followed and also were saluted. Simultaneously Greek officials paid honors to the dead at a memorial service.

Thus Greece discharged the measures of apologizing prescribed by the Allies for the Janina murders, and the incident that for a time threatened the peace of the Balkans, is regarded as closed.

Pay Fines in Coal

Berlin.—Briguettes, the standard form of domestic fuel, have been adopted by one Berlin court as a unit of value in order to avoid depreciation of mark fines. A gambler who was arraigned before the court was sent to jail and fined 500 pounds of briquettes, or the value of that weight of briquettes, to be paid within a fortnight.

Swiss Farmers For Canada

Victoria, B.C.—Thousands of Swiss farmers are eager to come to Canada if opportunities for settlement here are available for them.

Lack Of Vessels May Cause Congestion In Grain Movement

Montreal.—Conflicting opinions are current in Montreal as to the probable congestion in the movement of the western grain crop, resulting from the final refusal of the American Great Lakes vessel owners to compete in the Canadian grain carrying trade while the tariff biling regulations of the inland Water Freight Rates Act are continued in existence by the Canadian Government.

That the entire Canadian-owned fleet would not be able to move some 25,000,000 bushels, leaving an exportable surplus of approximately 100,000,000 bushels either at the head of the lakes or in western elevators, unless the government relaxed the regulations, was the opinion expressed by operators of Canadian lake carriers. On the other hand, grain exporters tend to the opinion that the crop will be moved and that there is no need of undue anxiety. This is the conclusion reached by James Carruthers, of the grain exporting firm of James Carruthers and Company, Ltd., who stated that already American vessels have contracted to carry 12,000,000 to 13,000,000 bushels during October and November.

Fort William, Ont.—Immense activity may be expected along the water front in the opening days of the grain clearance. About 1,000 cars a day are being delivered to elevators in both ports daily, and this number will be doubled before the month is out.

Peaceful Settlement in Sight
Belgrade.—The Jugo-Slav cabinet, after considering every phase of the Fiume situation, has decided to defer action until it receives from Premier Mussolini detailed proposals which are to furnish a basis for actual negotiations. The Fiume incident apparently has been definitely removed from the acute phase that endangered a peaceful settlement of the controversy.

East and West—something may come out of the grain proposals. It is even said that the railways are favorably disposed. Evidence is accumulating that the eastern outlet for the grain products of the prairies stands to lose some of its exclusiveness. There is trouble over the lake shipping which in itself would suggest a certain diversion of the western route. Then, Vancouver has been putting up an active campaign for the utilization of its export facilities which are being markedly increased this year, while strong support of the western routes comes from Alberta. A new elevator is about to be constructed there. This year's crop is such a record one as to promise to tax the capacity of all the railways and steamship lines in the east, and this affords another argument for developing the Pacific and Panama route. The government is not disposed nor finally equipped to go ahead—now at all events—with the Hudson's Bay Railway, and, if existing channels can be made wholly adequate, there will be less reason to open up that route.

Although the commission is not "instructed" to its course, the suggestion of immediate consideration and "effective action" is regarded as significant. It is anticipated that the hearing will take place in October, the length of it depending wholly upon the attitude of the railways and the extent to which they may voluntarily be prepared to go, whatever is done. The purpose is to have it done for this year's crop. It was not pronounced upon by the board before and did not figure in the appeal, save for being stressed in the argument. On the judgment which was appealed from there has been no decision nor is it likely for a month or so.

All elevators are cleared for action and have practically double their staffs over the summer time establishment, about 1,400 being carried on the payroll. Today 13 ships are loading and seven are on their way.

Slight Earthquake in England

East Coast Felt Tremor But No Noticed Far Island

London.—A slight earth tremor occurred Sept. 29 at Cromer, Norfolk, says the Daily Mail. The vibration was accompanied by a loud rumbling, while windows rattled and ornaments within houses were displaced. The tremor was felt in many of the parishes on the east coast, apparently it was not noticed far inland. The time of the shock was 11:52 a.m. One suggested cause of the tremor was an explosion at sea, but nothing of the kind has as yet been reported.

Peaceful Settlement in Sight

Belgrade.—The Jugo-Slav cabinet, after considering every phase of the Fiume situation, has decided to defer action until it receives from Premier Mussolini detailed proposals which are to furnish a basis for actual negotiations. The Fiume incident apparently has been definitely removed from the acute phase that endangered a peaceful settlement of the controversy.

Evidence is accumulating that the eastern outlet for the grain products of the prairies stands to lose some of its exclusiveness. There is trouble over the lake shipping which in itself would suggest a certain diversion of the western route. Then, Vancouver has been putting up an active campaign for the utilization of its export facilities which are being markedly increased this year, while strong support of the western routes comes from Alberta. A new elevator is about to be constructed there. This year's crop is such a record one as to promise to tax the capacity of all the railways and steamship lines in the east, and this affords another argument for developing the Pacific and Panama route. The government is not disposed nor finally equipped to go ahead—now at all events—with the Hudson's Bay Railway, and, if existing channels can be made wholly adequate, there will be less reason to open up that route.

Although the commission is not "instructed" to its course, the suggestion of immediate consideration and "effective action" is regarded as significant. It is anticipated that the hearing will take place in October, the length of it depending wholly upon the attitude of the railways and the extent to which they may voluntarily be prepared to go, whatever is done. The purpose is to have it done for this year's crop. It was not pronounced upon by the board before and did not figure in the appeal, save for being stressed in the argument. On the judgment which was appealed from there has been no decision nor is it likely for a month or so.

West—something may come out of the grain proposals. It is even said that the railways are favorably disposed. Evidence is accumulating that the eastern outlet for the grain products of the prairies stands to lose some of its exclusiveness. There is trouble over the lake shipping which in itself would suggest a certain diversion of the western route. Then, Vancouver has been putting up an active campaign for the utilization of its export facilities which are being markedly increased this year, while strong support of the western routes comes from Alberta. A new elevator is about to be constructed there. This year's crop is such a record one as to promise to tax the capacity of all the railways and steamship lines in the east, and this affords another argument for developing the Pacific and Panama route. The government is not disposed nor finally equipped to go ahead—now at all events—with the Hudson's Bay Railway, and, if existing channels can be made wholly adequate, there will be less reason to open up that route.

Although the commission is not "instructed" to its course, the suggestion of immediate consideration and "effective action" is regarded as significant. It is anticipated that the hearing will take place in October, the length of it depending wholly upon the attitude of the railways and the extent to which they may voluntarily be prepared to go, whatever is done. The purpose is to have it done for this year's crop. It was not pronounced upon by the board before and did not figure in the appeal, save for being stressed in the argument. On the judgment which was appealed from there has been no decision nor is it likely for a month or so.

Mother and Son Face Murder Charge

Alleged Boy Was Ordered By Woman To Shoot Neighbor

Winnipeg.—A mother and son will face a murder charge when a preliminary hearing into the shooting to death of Mrs. Anna Kunka is opened at Pine River, near Dauphin, Man. There was a quarrel over some strayling cattle, Mrs. P. Sawicki was badly beaten, and it is alleged she ordered her 13-year-old son Peter to fire at Mrs. Kunka. The shot, she claimed, was fired in self-defence, and now both the woman and her son are charged with murder. The quarrel and death occurred on September 1.

Stinnes After Russian Concessions
Moscow.—Hugo Stinnes, the German industrialist, is in Moscow seeking to obtain agricultural concessions from the Soviet Government.

NOTICE!

On and after October 1st, 1923, the Curfew By-Law of the Town of Blairmore will be enforced.

All children 14 years and under must be off the streets by 9 p.m., unless in the immediate care of a parent or guardian.

Parents take notice that after a fair warning has been given that children found on the street after 9 p.m. will be dealt with according to By-Law No. 14.

The school bell will be rung at 8.55 p.m. as a warning to the children.

By Order,
The Mayor and Council of
the Town of Blairmore.

Local and General Items

For funeral services phone 212. **Crows' Nest Funeral Undertaking Co.**

One always enters a restaurant for butter or for worse.

Anti-prohibitionists should have a law introduced, prohibiting prohibitionists from prohibiting you.

Albert Pondelicek, of Portland, Oregon, is here at present visiting his brother, Mr. Tony Pondelicek.

Miss Mary McLennan relieved Miss McDougall for a few days during the week as matron of the local hospital.

James Milne, of the local branch of P. Burns & Co., is at present relieving G. Parker in the firm's shop at Taber.

Henry Zak returned last evening from a visit to his home in Bohemia. Henry crossed the Pond on the C.P.R. Steamship Minnedosa.

James Vincent was up from Medicine Hat on Monday to attend the funeral of his intimate friend, the late Mr. Pistor.

The Patriarchal Degree was conferred upon a class of three candidates at the regular meeting of Crows' Nest Encampment last night.

The harbor tug Peggy McNeill sank in Fortier's Pass, near Vancouver, on Monday morning with a load of five members of the crew.

Write in connection with the liquor plebiscite will be issued to returning officers about October 9th, giving twenty-seven clear days before voting day.

Miss Marion Ennis left last week for Calgary to take a course in nursing at the Holy Cross hospital. She was joined this week by Miss Lucy Hinds.

A Foster weather prediction says there will be a dry period between October 31st and March 1st. Of course, Foster would not refer to prohibition and the like.

Albert Mutz says that the hardest week's task you can undertake in Germany is counting the German currency purchased with a Canadian five-dollar bill.

Dr. Olivier motored to Lethbridge and Calgary on Sunday last and returned to town yesterday in a brand new Hudson Super-Six, having turned in the Hupmobile.

Eight carloads of "hair tonic," the kind that is applied internally, were seized in New York yards on Tuesday. Prohibition agents claim the stuff is worth \$500,000 on the moonshine market.

They say that drink makes a man see double. If that's the case we would advise shareholders of the Home Bank to refrain from drinking—the double liability itself is enough and should not be redoubled.

A number of members of Crowview Rebekah Lodge will journey to Pincher Creek on October 9th, where they will visit the Rebekahs of that town. A grand time is looked forward to.

The attorney-general's legalized gambling devices—the slot machines—became so ashamed of themselves that they turn their faces to the wall when a poor sucker of a man goes broke through their operation.

Doctors, nurses, press reporters, lawyers and preachers were called out at an early hour on Monday to attend a boxing exhibition, preliminary to the next Dempsey-Virgo go. Two falls, three shots and seven eye-openers were secured.

A number of members of the Rocky Mountain, Sentinel and Summit lodges of the A. F. & A. M., journeyed to Pincher Creek on Tuesday night to attend some special doings.

Carl Smith and two brothers returned last week end from an unsuccessful hunt in the mountains for sheep and goat. They journeyed on horseback to the peaks, about thirty miles southwest of Blairmore. Although seeing considerable fresh signs, they failed to locate the game.

Mr. Velch, who recently arrived from Ireland, this week donned the uniform of a full-fledged member of the Alberta provincial police force and succeeds Constable Wilson, who left here on Sunday to take up duties at Barons. Rumor has it that Constable Wilson is shortly to join the army—of benedicts.

A local party yesterday attempted to ride his car over the pegs set in by the surveyors to mark the proposed new trunk road through this district. He claims that the improvement is very noticeable and that a car can ride over the pegs without feeling a rut or bump in the road.

No less than five patients were being cared for at the local reformatory this week, one serving a sentence of three months, one six weeks, and two of the others four weeks. All are busy at work trying to make the government's property here look better.

WANTED TO BORROW—Two or three thousand dollars on First Mortgage Security at Coleman. Interest at 8 per cent per annum. Apply The Enterprise, Blairmore.—27-2

PICKED UP—American Nickel or Silver Watch, Gent's. Owner can have same on applying to Mr. W. Turner and proving ownership.

A REWARD of \$10.00 is offered for information that will lead to the arrest and conviction of the party or parties who deliberately destroyed a road sign west of the Greenhill hotel, the property of the Blairmore Board of Trade. This sign was intended to direct attention of the travelling public to the Blairmore golf course and other points of interest and was not deserving of such treatment.

BUSINESS FOR SALE—Being compelled to return to Ontario this fall, I am offering my Plant and Business for sale as a going concern. Any one wishing a profitable and growing business should call and investigate my proposition. Will guarantee to teach an inexperienced purchaser.—W. M. BUSH, Vulcanizing and Battery Service, Blairmore, Alberta.

OREGON FARMING PAYS—Ten years ago Mr. Albert Pondelicek left Alberta for Oregon with a few hundred dollars. Today he has a twenty-thousand-dollar farm. He is visiting his brother, Tony Pondelicek, at Blairmore for a couple of weeks and would be pleased to meet anyone wanting reliable information on Oregon opportunities.

Tenders Wanted

TENDERS will be received not later than Monday, 12 o'clock noon, October 1st, 1923, for the construction of a Curling and Skating Rink at Bellevue, Alberta, according to plans and specifications, copies of which can be obtained from H. Barlass, secretary, Bellevue Covered Rink.

Tenders must be accompanied by a certified cheque of 10 per cent of tender, same to be returned to unsuccessful tenderer.

Lowest or any tender not necessarily accepted. Separate Tenders may be made for labor and material, or labor alone. Dated this 19th day of September, 1923.

H. BARLASS, Secretary, Bellevue Covered Rink.

WHY YOUR TROUSERS

should be made by us to measure. Ill-fitting trousers spoil the entire effect of a suit no matter whether the coat and vest fit all right. Besides, there's your comfort to consider. Waist too tight or too loose, seat the same, pinching crotch, ungraceful legs, awkward draping give you a sorry appearance. Try us on your next trousers and see the vast difference tailoring makes.

J. E. UPTON.
